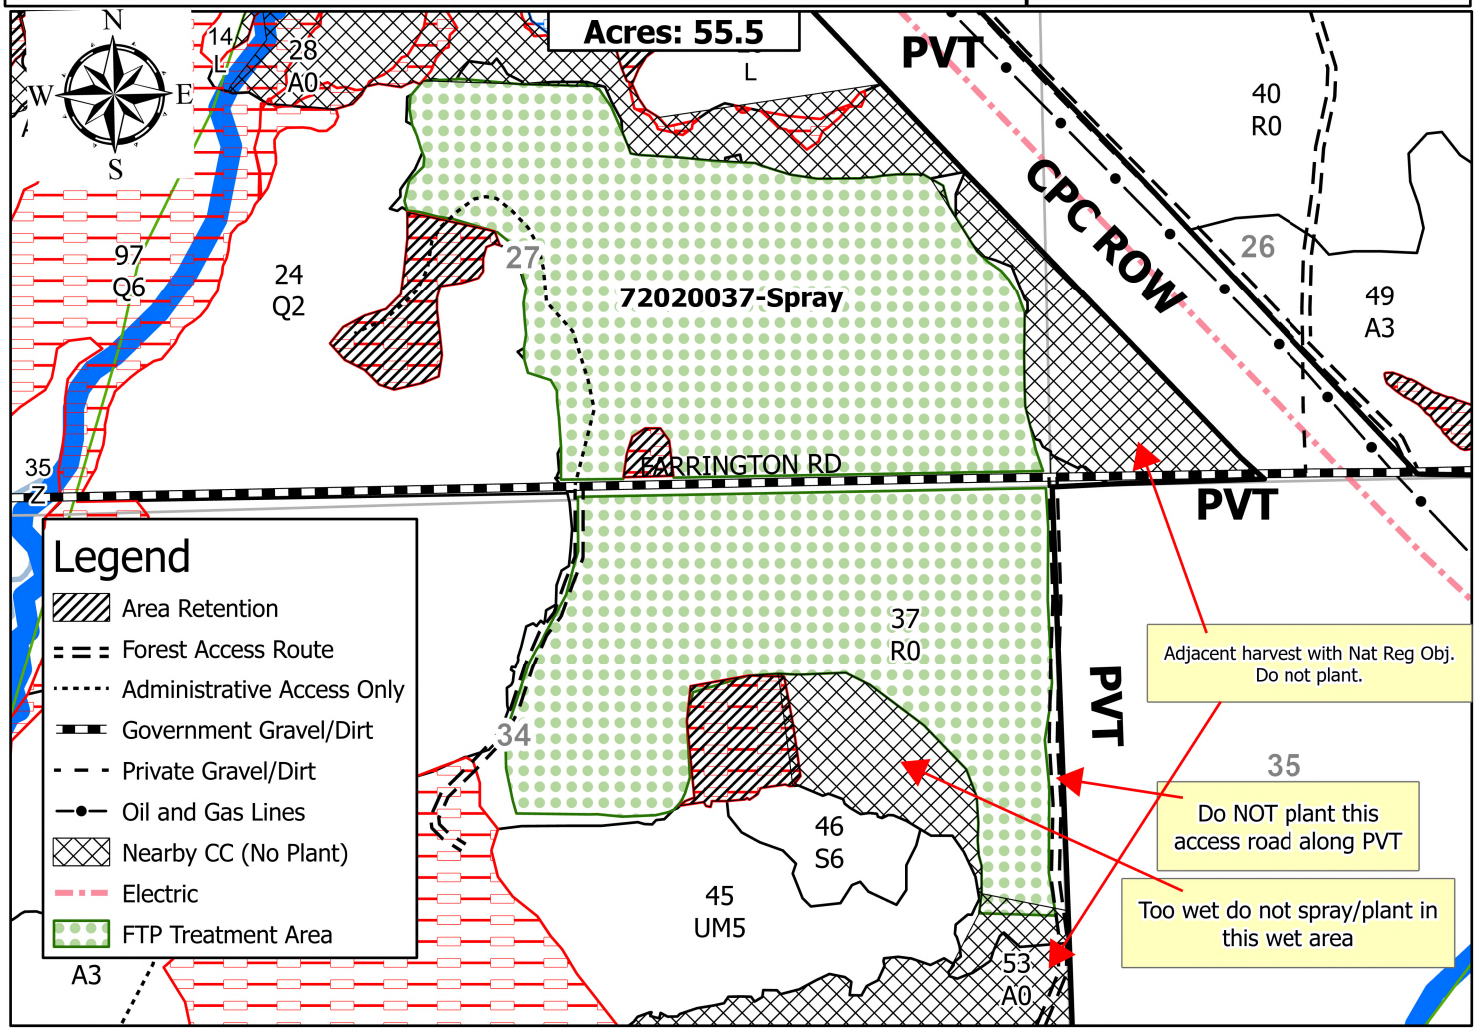
Implementation Notes

Comments: FTP Name: Big Creek Blues


The stand was harvested Summer/Fall 2025 (Tops were skid and chipped in Winter 2025). High water table is a potential concern for trenching. Current treatments cued up are to spray in 2026 and plant unfurrowed the following year. There are too many residual legacy trees for aerial spray to be an option. Closed roads to the west can be planted through.
