ANN ARBOR, MICHIGAN

RECEIVED
MAY 9 1931
FISH DIVISION

May 7, 1931

Report No. 59

REPORT ON IDENTIFICATION OF TROUT SENT BY R. BINDER CO.
OF BATTLE CREEK, ON MAY 5, 1931

On May 5, 1931, the Institute received from R. Binder Co., of Battle Creek one specimen in the flesh, unpreserved, and cleaned, of the rainbow trout, Salmo gairdnerii irideus. The fish was in the so-called "steelhead" phase, which means that it had been caught either in a large lake or in the ocean, for it is only in such waters that these fish become of this appearance. It is a fish of the same species as runs into our streams from the Great Lakes, assuming then the markings which call forth the name "rainbow trout".

The letter accompanying the shipment stated:

"At the request of H. E. Green, we are shipping by express today a Lake Salmon or Salmon Trout.

"We'll try and send you another one later, one with better colors".

This report is prepared by the undersigned, and is submitted to Mr. Hugh E. Green, Law Enforcement Division, Department of Conservation.
