

# Compartment Review Presentation

## Gwinn Forest Management Unit

Compartment 32293

Entry Year: 2026

Acreage: 1,314

County: Marquette

Management Area: Menominee-Marquette

**Stand Examiner:** Kyle Gould

### Legal Description:

T46N-R23W, Sections 4, 5 & 6.

### Identified Planning Goals:

Harvest older stands of aspen, birch and spruce/fir to encourage regeneration of these species. Selectively harvest northern hardwood types to improve quality and promote regeneration.

### Soil and topography:

Soils are very poorly drained organic soils and poorly drained loamy soils. Glacial drainage ways, till plains and ground moraines form topography that is nearly level to moderately steep.

### Ownership Patterns, Development, and Land Use in and Around the Compartment:

This compartment is part of a large block of state ownership that contains a few small non-industrial private ownerships. Land use is primarily for forest product production and recreation.

### Unique Natural Features:

Mixed lowland habitats support a variety of less common ground flora in this compartment.

### Archeological, Historical, and Cultural Features:

There are known concerns within the compartment. All proposed management activities have taken these concerns into consideration.

### Special Management Designations or Considerations:

Timber management operations will be limited to a winter harvest to protect the soils within this compartment.

### Watershed and Fisheries Considerations:

Fisheries Values: Good

Fisheries Concerns: This compartment contains sections of LeVassuer Creek, East Branch LeVassuer Creek and in the west section the Chocolay River. The Chocolay River is a designated trout stream that receives runs of salmon and steelhead. Stand 8 along the Chocolay River calls for a selection cut and needs to include a no cut buffer of the river at a minimum of 100 feet. Stands 19 and 27 each contain a small component of aspen. The prescribed clear-cuts need to buffer LeVassuer Creek and East Branch LeVassuer Creek at a minimum of 150 feet. Both streams have potential for resident brook trout.

### Wildlife Habitat Considerations:

This compartment is found within the Menominee-Marquette Management Area, on a Till-floored Lake Plain in northeastern Marquette County. The dominant Natural Communities are mesic northern forest and poor conifer swamps. Major forest cover types include Northern Hardwoods, Aspen, and Hemlock. Wildlife species considerations in the Sand River Lake Plain Man include managing to provide coniferous thermal cover for deer wintering complexes. The emphasis should be on hemlock in this management area as it represents approximately 20% of the WUP hemlock resource. Along with maintaining wildlife movement corridors along vernal and permanent riparian watercourses is also very important. Wildlife management issues in the management area are habitat fragmentation; coarse woody debris; retain or develop large living and dead standing trees (for cavities); mesic conifer; mature forest; within-stand diversity; and deer wintering complexes.

The following have been identified as featured species for the Menominee-Marquette Management Area: American Woodcock, Blackburnian Warbler, Cerulean Warbler, Golden-winged Warbler, Black-backed Woodpecker, Ruffed Grouse, Turkey, American Marten, Snowshoe Hare, White-tailed Deer, Black Bear.

### Mineral Resource and Development Concerns and/or Restrictions

Surface sediments consist of an end moraine of coarse-textured till sometimes thin to discontinuous over bedrock and minor lacustrine (lake) clay and silt. The glacial drift thickness varies between 10 and 50 feet. The Precambrian Jacobsville Sandstone subcrops below the glacial drift. The Jacobsville was previously used as a building stone. Gravel Pit #58 is located in Section 5 and potential is good. This compartment has never been leased for metallic exploration. There is no

economic oil and gas production in the UP.

**Vehicle Access:**

Vehicle access to the southern portion of this compartment is good by way of a paved county road (Yalmer Road). An abandoned railroad grade provides limited access to a portion of the West side of the compartment. Camp 4 road is a two track maintained by the state but is currently in poor condition due to beaver activity.

**Survey Needs:**

Survey is needed in the Southeastern end of the compartment along stands 39, 40, and 41.

**Recreational Facilities and Opportunities:**

There is no developed recreation in this area. The heaviest public use is for hunting and trapping.

**Fire Protection:**

Fire occurrence is low in this area due to wet soils. Access would be difficult within the interior if a fire were to occur off of the main roads within this compartment.

**Additional Compartment Information:**

The following reports from the Inventory are attached:

- Total Acres by Cover Type and Age Class
- Cover Type by Harvest Method
- Proposed Treatments – No Limiting Factors
- Proposed Treatments – With Limiting Factors
- Stand Details (Forested and Nonforested)
- Dedicated and Proposed Special Conservation Areas
- Site Condition Details

The following information is displayed, where pertinent, on the attached compartment maps:

- Base feature information, stand boundaries, cover types, and numbers
- Proposed treatments
- Site condition boundaries
- Details on the road access system

**Proposed Treatments:**

<b>1</b>	<b>32293001-Cut</b>	1.8	4112 - Maple, Beech, Cherry Association	Poletimber Well	95	81-110	Harvest	Shelterwood	4319 - Mixed Upland Forest	Two-Aged	No
----------	---------------------	-----	---	-----------------	----	--------	---------	-------------	----------------------------	----------	----

Prescription Specs: Leave all cedar, hemlock, and white pine. Mark additional trees to 30-40 BA. Retain some of every species. Leave some large Bigtooth Aspen in the stand if present.

Next Step Treatments: Monitoring, Natural Regen (Re-Inventory)

Acceptable Regen: Any species currently found on site.

Other Comment: Winter harvest due to wet areas in stand access route.

Site Condition:

Proposed Start Date: 10/1 /2025

<b>3</b>	<b>32293003-Cut</b>	14.2	4112 - Maple, Beech, Cherry Association	Poletimber Well	95	81-110	Harvest	Shelterwood	4319 - Mixed Upland Forest	Two-Aged	No
----------	---------------------	------	---	-----------------	----	--------	---------	-------------	----------------------------	----------	----

Prescription Specs: Leave all cedar, hemlock, and white pine. Mark additional trees to 30-40 BA. Retain some of every species. Leave some large Bigtooth Aspen in the stand if present.

Next Step Treatments: Monitoring, Natural Regen (Re-Inventory)

Acceptable Regen: Any species currently found on site.

Other Comment: Winter harvest due to wet areas in access route.

Site Condition:

Proposed Start Date: 10/1 /2025

<b>6</b>	<b>32293006-Cut</b>	1.4	4119 - Mixed Northern Hardwoods	Poletimber Well	95	81-110	Harvest	Clearcut	4319 - Mixed Upland Forest	Even-Aged	No
----------	---------------------	-----	---------------------------------	-----------------	----	--------	---------	----------	----------------------------	-----------	----

Prescription Specs: Clearcut. Leave cedar, hemlock, and white pine. No retention due to small stand size.

Next Step Treatments: Monitoring, Natural Regen (Re-Inventory)

Acceptable Regen: Any species currently found on site

Other Comment: Winter cut due to wet soils in access route.

Site Condition:

Proposed Start Date: 10/1 /2025

Standard

Treatment Name	Acres	Stand CoverType	Size Density	Stand Age	BA Range	Treatment Type	Treatment Method	Cover Type Objective	Age Structure	Habitat Cut
----------------	-------	-----------------	--------------	-----------	----------	----------------	------------------	----------------------	---------------	-------------

<b>8 32293008.10_Cut</b>	14.4	4112 - Maple, Beech, Cherry Association	Sawtimber Well	95	111-140	Harvest	Single Tree Selection	411 - Northern Hardwood	Uneven-Aged	No
--------------------------	------	---	----------------	----	---------	---------	-----------------------	-------------------------	-------------	----

Prescription Mark to 50-70 BA. Release areas of advanced regeneration and make gaps to encourage new regeneration. Winter harvest due to wet areas in access route. Cut all merchantable spruce and fir. Retain all cedar and hemlock.

Specs:

Next Step Monitoring, Natural Regen (Re-Inventory)

Treatments:

Acceptable Any species currently found on site.

Regen:

Other Buffer river and keep treatment on top of the ridge along the river.

Comment:

Site Condition:

Proposed Start Date: 10/1 /2025

<b>8 32293008.9_Cut</b>	13.7	4112 - Maple, Beech, Cherry Association	Sawtimber Well	95	111-140	Harvest	Shelterwood	4319 - Mixed Upland Forest	Two-Aged	No
-------------------------	------	---	----------------	----	---------	---------	-------------	----------------------------	----------	----

Prescription Leave all cedar, hemlock, and white pine. Mark additional trees to 30-40 BA. Retain some of every species.

Specs:

Next Step Monitoring, Natural Regen (Re-Inventory)

Treatments:

Acceptable Any species currently found on site.

Regen:

Other Winter harvest due to wet soils in stand access route.

Comment:

Site Condition:

Proposed Start Date: 10/1 /2025

<b>27 32293027-Cut</b>	50.7	4191 - Mixed Upland Deciduous with Conifer	Poletimber Well	96	81-110	Harvest	Clearcut with Retention	4319 - Mixed Upland Forest	Even-Aged	No
------------------------	------	--	-----------------	----	--------	---------	-------------------------	----------------------------	-----------	----

Prescription Clearcut with retention. Treatment area may vary significantly based on ground conditions. Leave cedar, hemlock, and white pine. Exclude areas with very wet soils as retention. Access from the north off camp 4 road. Winter harvest only. Some mats may be needed and a temporary road into the stand is needed. Some road work will be needed on camp 4 road. There is a gravel pit nearby.

Specs:

Next Step Monitoring, Natural Regen (Re-Inventory)

Treatments:

Acceptable Any species currently found on site.

Regen:

Other Access will be from the north through stand 38 of compartment 286. There is a dry ridge between wetlands that will work to build a road to access the stand.

Comment:

Site Condition: Road Needed

Proposed Start Date: 10/1 /2025

Standard

Treatment Name	Acres	Stand CoverType	Size Density	Stand Age	BA Range	Treatment Type	Treatment Method	Cover Type Objective	Age Structure	Habitat Cut

## Report 5 – PROPOSED SPECIAL CONSERVATION AREA\* (SCA) DETAILS

\* This is a partial list of SCAs for this compartment. Not included are those areas identified under other Department initiatives (Natural Rivers, Deer Wintering Areas, etc.). Those will be identified in separate, future map and report products.

SCA Name	SCA Category	Detail Type	Recommendation	Acres
----------	--------------	-------------	----------------	-------

---

Comments

---

### Report 6 – EXISTING SPECIAL CONSERVATION AREA DETAILS

\* This is a list of SCA's for this compartment along with a 1/4 mile buffer surrounding the compartment. Refer to the Special Conservation Area Map for locations of the below listed Conservation Areas.

ERA = Ecological Reference Area  
HCVA = High Conservation Value Area  
SCA = Special Conservation Area

Conservation Area	Type	Description
SCA	Cold Water Stream	A coldwater stream has temperature and dissolved oxygen conditions that allow naturally-reproduced or stocked trout populations and those of other coldwater fish species (e.g., slimy sculpin) to persist from year to year. Coldwater streams in Michigan typically provide these conditions due to substantial contributions of groundwater to their stream flows. Such streams are established by Director's action and designated as trout resources by Fisheries Order 210.

Stand	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	Managed Site	General Comments
