

Canada Creek DNR Sandpits

Fish Species

Brook Trout

Species Description

Brook trout are the primary trout species encountered at this location.

Geographic Coordinates

Lat:45.228767 / Long:-84.220283

Noteworthy

The MDNR operated a sand trap on the Canada Creek at this location at one time. This reach of the creek is popular among local campers. The stream is narrow and fairly deep at times and the substrate is predominantly sand.

Fishing Regulations

This site on Canada Creek is a designated Type 1 trout stream. Please refer to the Inland Trout and Salmon Stream Regulations in the current Michigan Fishing Guide.

Directions to Site

From the trail road immediately north of the Canada Creek DNR Stairs site, continue 0.1 mile southwest until position coordinates are reached.
