

Compartment Review Presentation

Gaylord Forest Management Unit

Compartment 52063

Entry Year 2023

Acreage: 3,806

County Antrim

Management Area: Grayling Outwash

Revision Date: 2021-05-04

Stand Examiner: Zach Crew

Legal Description:

T29N-R05W, Sections 21, 22, 27, 28, 33, and 34

Identified Planning Goals:

To provide for the protection, integrated management and responsible use of a healthy, productive, and undiminished forest resource base for the social, recreational, environmental, and economic benefit of the State of Michigan.

Soil and topography:

This compartment is relatively flat with no slopes that exceed 10 percent. The soil type in this area is dominated by Kalkaska Sand.

Ownership Patterns, Development, and Land Use in and Around the Compartment:

This compartment is a contiguous block of state owned land. There are some private land holdings to the north and south west portions of the compartment.

Unique Natural Features:

None

Archeological, Historical, and Cultural Features:

None

Special Management Designations or Considerations:

None

Watershed and Fisheries Considerations:

This compartment contains Sand Lake, though none of the proposed treatments appear to be adjacent to surface waters.

Wildlife Habitat Considerations:

This compartment is part of the Sand Lake area and currently provides a mosaic of pine, aspen, and upland brush. The long-term goals are to provide larger areas of these covertypes. This will benefit wildlife species that prefer larger contiguous areas for their habitat requirements.

Mineral Resource and Development Concerns and/or Restrictions

The nearest active sand/gravel pit is more than four miles away, but there may be sand & gravel potential within the compartment. Most of the State land in the compartment is currently leased for oil and gas development and held by production of gas from the Antrim Shale. There has been some oil & gas production from Guelph (Niagaran) reefs to the south. Additional Antrim wells within the compartment could be possible, if the price of gas were to increase significantly. There may be potential for future gas storage development within some of the depleted reefs reservoirs. Active gas storage fields are located just to the southwest. There is no known potential for metallic minerals in this part of the state.

Vehicle Access:

This compartment is easily accessible to vehicles of all kinds. There are multiple seasonal county roads throughout the compartment and Mancelona Road borders the north boundary. There are also plenty of gas well roads throughout the compartment that provide vehicular access to nearly every stand.

Survey Needs:

None

Recreational Facilities and Opportunities:

There is a portion of a snowmobile trail as well as an ATV trail that cross through the compartment. A portion of the NCT also crosses through the west side of the compartment.

Fire Protection:

Fire protection for this area is provided out of the Bellaire and Gaylord Field Offices. There is some potential with the cover types in the area for a large scale fire event.

Additional Compartment Information:

The following reports from the Inventory are attached:

- Total Acres by Cover Type and Age Class**
- Cover Type by Harvest Method**
- Proposed Treatments – No Limiting Factors**
- Proposed Treatments – With Limiting Factors**
- Stand Details (Forested and Nonforested)**
- Dedicated and Proposed Special Conservation Areas**
- Site Condition Details**

The following information is displayed, where pertinent, on the attached compartment maps:

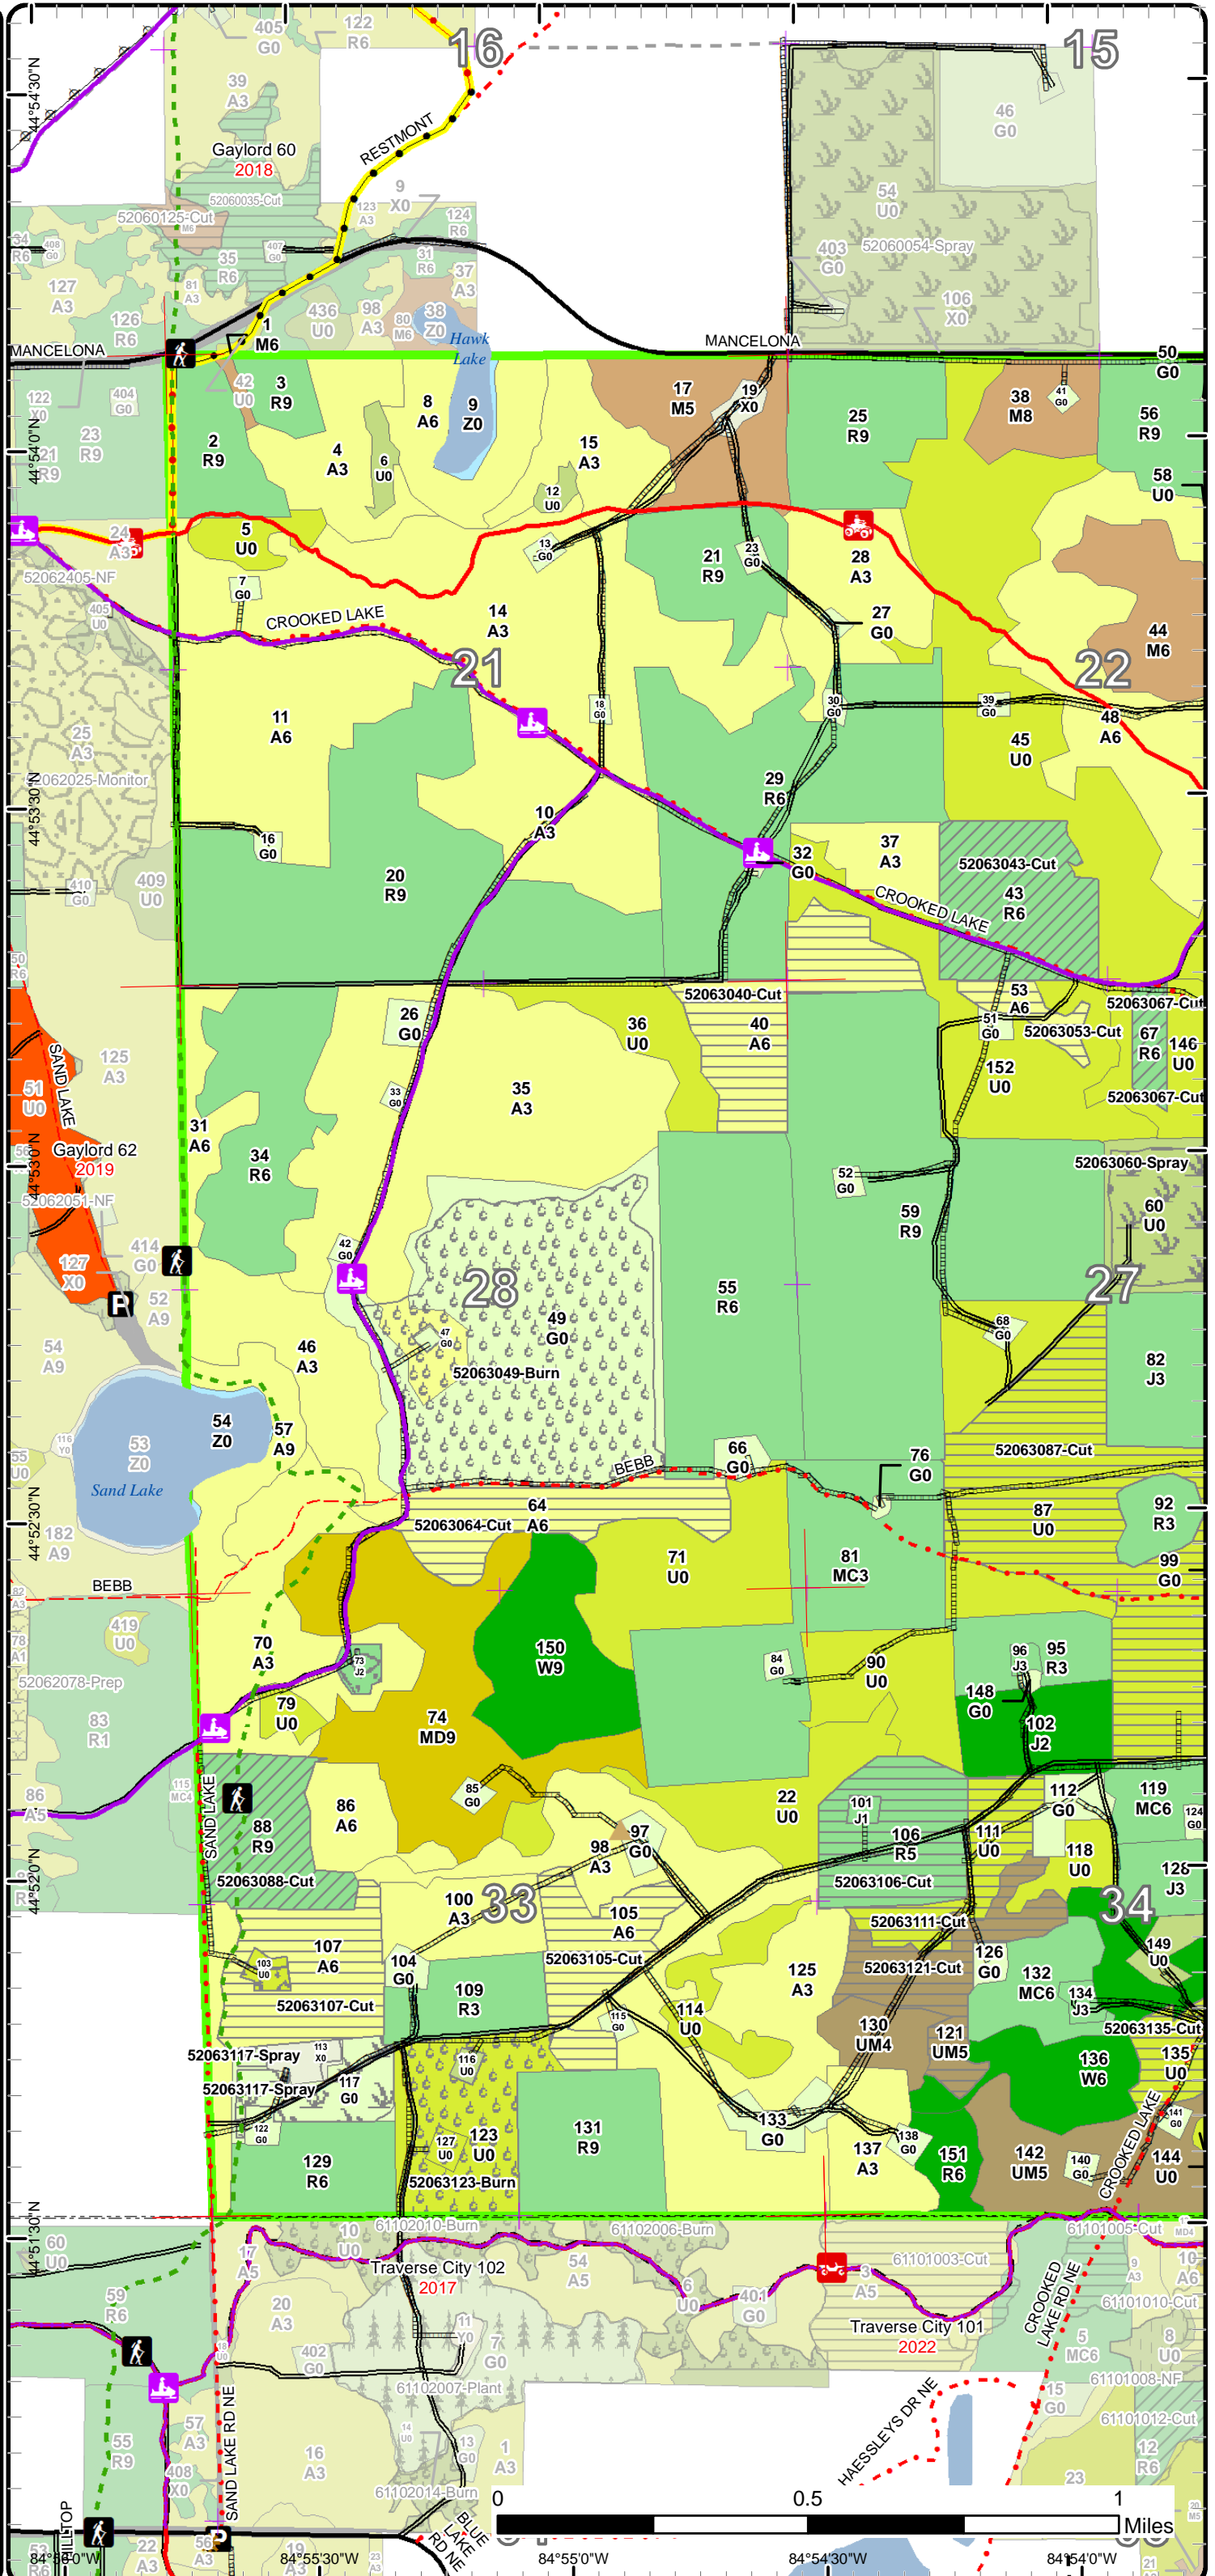

- Base feature information, stand boundaries, cover types, and numbers**
- Proposed treatments**
- Site condition boundaries**
- Details on the road access system**

Treatment Name	Acres	Stand CoverType	Size Density	Stand Age	BA Range	Treatment Type	Treatment Method	Cover Type Objective	Age Structure	Habitat Cut
121 52063121-Cut	27.3	4311 - Pine, Aspen Mix	Poletimber Medium	79	1-50	Harvest	Clearcut with Retention	4311 - Pine, Aspen Mix	Two-Aged	No
<u>Prescription</u> Cut all merchantable species except for white pine. Be sure to include specs to protect advanced conifer regen where it occurs.										
<u>Specs:</u>										
<u>Next Step</u> Monitoring, Natural Regen (Intermediate)										
<u>Treatments:</u>										
<u>Acceptable Regen:</u> New regeneration should consist of aspen, cherry, and red maple, with some scattered jack pine and white pine.										
<u>Other Comment:</u> Include appropriate trail protection specs depending on haul routes, also include specs to protect wildlife shrubs. Retention shall be all white pine left, as well as protected sapling conifers.										
<u>Site Condition</u>										
<u>Proposed Start Date:</u> 10/1 /2022										
123 52063123-Burn	34.2	330 - Low-Density Trees	Nonstocked	0		Burn	Opening	3301 - Low Density Deciduous Trees		No
<u>Prescription</u> Prescribed burn in conjunction with adjacent prescribed stands to maintain opening characteristics and set back woody vegetation.										
<u>Specs:</u>										
<u>Next Step</u> Burn, Opening										
<u>Treatments:</u>										
<u>Acceptable Regen:</u>										
<u>Other Comment:</u>										
<u>Site Condition</u>										
<u>Proposed Start Date:</u> 10/1 /2022										
135 52063135-Cut	61.7	330 - Low-Density Trees	Nonstocked			Harvest	Clearcut	4211 - Planted Red Pine	Even-Aged	No
<u>Prescription</u> Attempt to commercially harvest in order to clean up the site to allow for reforestation activities.										
<u>Specs:</u>										
<u>Next Step</u> SitePrep, Roller Chopping; SitePrep, Trenching; Pesticide, Skidder - Site Prep; Planting, Initial Plant										
<u>Treatments:</u>										
<u>Acceptable Regen:</u> A well stocked red pine plantation.										
<u>Other Comment:</u> No retention due to this being a non forested stand and it being decided to convert it to a forested stand.										
<u>Site Condition</u>										
<u>Proposed Start Date:</u> 10/1 /2022

Report 5 – PROPOSED SPECIAL CONSERVATION AREA* (SCA) DETAILS

* This is a partial list of SCAs for this compartment. Not included are those areas identified under other Department initiatives (Natural Rivers, Deer Wintering Areas, etc.). Those will be identified in separate, future map and report products.

SCA Name	SCA Category	Detail Type	Recommendation	Acres
----------	--------------	-------------	----------------	-------

Comments

Report 6 – EXISTING SPECIAL CONSERVATION AREA DETAILS

* This is a list of SCA's for this compartment along with a 1/4 mile buffer surrounding the compartment. Refer to the Special Conservation Area Map for locations of the below listed Conservation Areas.

ERA = Ecological Reference Area
HCVA = High Conservation Value Area
SCA = Special Conservation Area

Conservation Area	Type	Description

26	3102 - Grass	Nonstocked	3.6			Managed Opening	Gravel removed from site and area has been seeded. Gate to remain in place with DNR lock 10/9/19. : Stand restored 2019. Restoration included recontouring, soil amendments, tilling and seasonal planting occurred before the final seed mix was planted in 2019. Gate at entrance and fence along state forest road are to remain in place until field staff determine they are no longer needed to protect the site and/or trail riders. (DNR lock on gate). Future maintenance or removal of the gate and fence are the responsibility of DNR (not oil/gas company). While no tree planting was associated with this restoration, in hind-site planting hawthorn and crap apple trees <6 feet tall along the north and west sides of the stand could have further enhanced the restoration and should be considered during future management of the site. RxM 10/2019.

Quaking Aspen	15	Sapling	2																																	
135	330 - Low-Density Trees	Nonstocked	61.7			No	Scattered cherry, red maple, white pine, and jack pine.																													
136	42200 - Natural White Pine	Poletimber Well	43.2	75	141-170	N/A	Large diameter legacy white pine present throughout the stand (DBH 34" and up). Evidence of lightning damage and some trees with existing dens. White pine filling in heaviest where larger trees present, some areas BA are over 200. Other areas have been filling in slower the farther they get from a seed source and are dominated by poles and saplings. BA ~ 156 from 8 plots. Red pine planted in 1950. Unsure of age of Xlog white pine (increment borer would not get to center of the tree). White pine age is for those that are the same size class as the red pine.
