

# Compartment Review Presentation

Sault Ste. Marie Forest Management Unit

Compartment 45117

Entry Year 2019

Acreage: 1,928

County Mackinac

Management Area: Carp River Red Pine

**Revision Date:** 2017-08-03

**Stand Examiner:** Matt Edison

**Legal Description:**

T42N-R6W Sections 3, 4 & 5; Moran Township

**Identified Planning Goals:**

The overall goals for the management of this compartment are to improve timber quality, wildlife habitat and to increase the biodiversity. There are selection harvests of northern hardwoods scheduled with goal to improve the timber quality and increase species diversity. There are several prescribed red pine thinnings to help maintain health and quality and to promote growth. The clear-cuts with reserves that are prescribed are to increase age class diversity in the mixed aspen/balsam-spruce/birch stands, which will improve habitat for various edge dependent species. The compartment has a number of grassy openings that support a decent blueberry crop. Consideration for treating one of the large openings with consult from wildlife division is prescribed. There is also a final harvest clear cut of a red pine stand to facilitate regeneration processes. Several red pine plantations are prescribed for health/pest monitoring.

**Soil and topography:**

The land is nearly level on outwash lake plains with inclusions of somewhat poorly drained soils. Wallace sand make up the majority of the soil with traces of Spot-Finch soils, Markey & Carbondale muck, Histosols and Aquents in the lowlands.

**Ownership Patterns, Development, and Land Use in and Around the Compartment:**

Compartment 117 is located two and a half mile northwest of the Village of Brevort. The compartment is surrounded by state ownership with some private property a half a mile to the south. The landscape is mostly wooded and is managed for timber production and for various wildlife habitats.

**Unique Natural Features:**

The compartment contains a couple of fens that support unique aquatic wildlife.

**Archeological, Historical, and Cultural Features:**

None found

**Special Management Designations or Considerations:**

The Little Brevort River will need to be buffered from timber sale activities to avoid soil erosion and sedimentation. Part of Carp River ERA plan.

**Watershed and Fisheries Considerations:**

This compartment contains reaches of Little Brevoort River and headwaters of Silver Creek. The region of the Little Brevoort River which is included in this compartment is designated a Type 1 trout stream less than 50' width. A 300' buffer is recommended for the Little Brevoort River in riparian areas susceptible to Aspen regeneration. This compartment also contains headwaters to Silver Creek which serves as a tributary to Boedine Bay in Brevoort Lake. Silver Creek is designated a Type 1 trout stream less than 50' width. A 300' buffer is recommended for Silver Creek in riparian areas susceptible to Aspen regeneration. For all other riparian areas, Best Management Practices should be followed to reduce erosion into waterbodies.

**Wildlife Habitat Considerations:**

This compartment is part of the Carp River Red Pine Management Area, and featured wildlife species include blackburnian warbler, red-shouldered hawk, ruffed grouse, and snowshoe hare. It contains a mix of types ranging from red pine and forest openings to lowland conifers and other lowland types, but seems to be dominated by upland types on sandy soils where pine is a common component. Hemlock will be retained where present, and other mesic conifers including white pine will be maintained to provide and promote mature mesic conifers in stands where present to benefit blackburnian warblers. Stream and riparian corridors will be left to provide travel corridors and other habitat components for warblers, snowshoe hare, deer, bear, amphibians and reptiles, and other species. The openings present provide habitat for sandhill crane and other birds favoring grasslands, particularly during migration. Diversity will be maintained in the compartment.

## **Mineral Resource and Development Concerns and/or Restrictions**

An active sand/gravel pit is located less than two miles to the southwest. Potential within the compartment is unknown. The glacial drift may be too thin in this area to produce significant quantities of sand and gravel. There may be limestone/dolostone potential, but geologic information for the area is lacking. There is no current economic oil and gas production in the UP and there is no known metallic mineral potential in this region. Much of the mineral rights beneath the compartment are privately owned.

## **Vehicle Access:**

The compartment has good vehicle access through out most of the compartment. The Carp River Truck Trail, a good dirt road, provides the access along the east and the Cut River Road/Brevort River Road provides access on the west side of the compartment. The Jackson Tr., a poor quality road, is the main access to the northern part of the compartment and the Goodreau Tr. Provides access to the southern part of the compartment.

## **Survey Needs:**

None

## **Recreational Facilities and Opportunities:**

: The area is used frequently by ORV recreationalist with the Carp River Truck trail being a snowmobile in the winter and the Goodreau Trail leading to the Brevort ORV trailhead. The area is also used by hunters and fishermen with the Brevort and Carp Rivers in the area.

## **Fire Protection:**

The compartment contains many fuel types and high levels of recreational use. There are nearby water sources with the Little Brevort River, Carp River, and the fens. Hendricks Township Fire Hall is 5 miles from the compartment and there is decent vehicle access. See Carp River ERA plan for fire response recommendations.

## **Additional Compartment Information:**

Carp River ERA plan to be reviewed.

## **The following reports from the Inventory are attached:**

- Total Acres by Cover Type and Age Class**
- Cover Type by Harvest Method**
- Proposed Treatments – No Limiting Factors**
- Proposed Treatments – With Limiting Factors**
- Stand Details (Forested and Nonforested)**
- Dedicated and Proposed Special Conservation Areas**
- Site Condition Details**

## **The following information is displayed, where pertinent, on the attached compartment maps:**

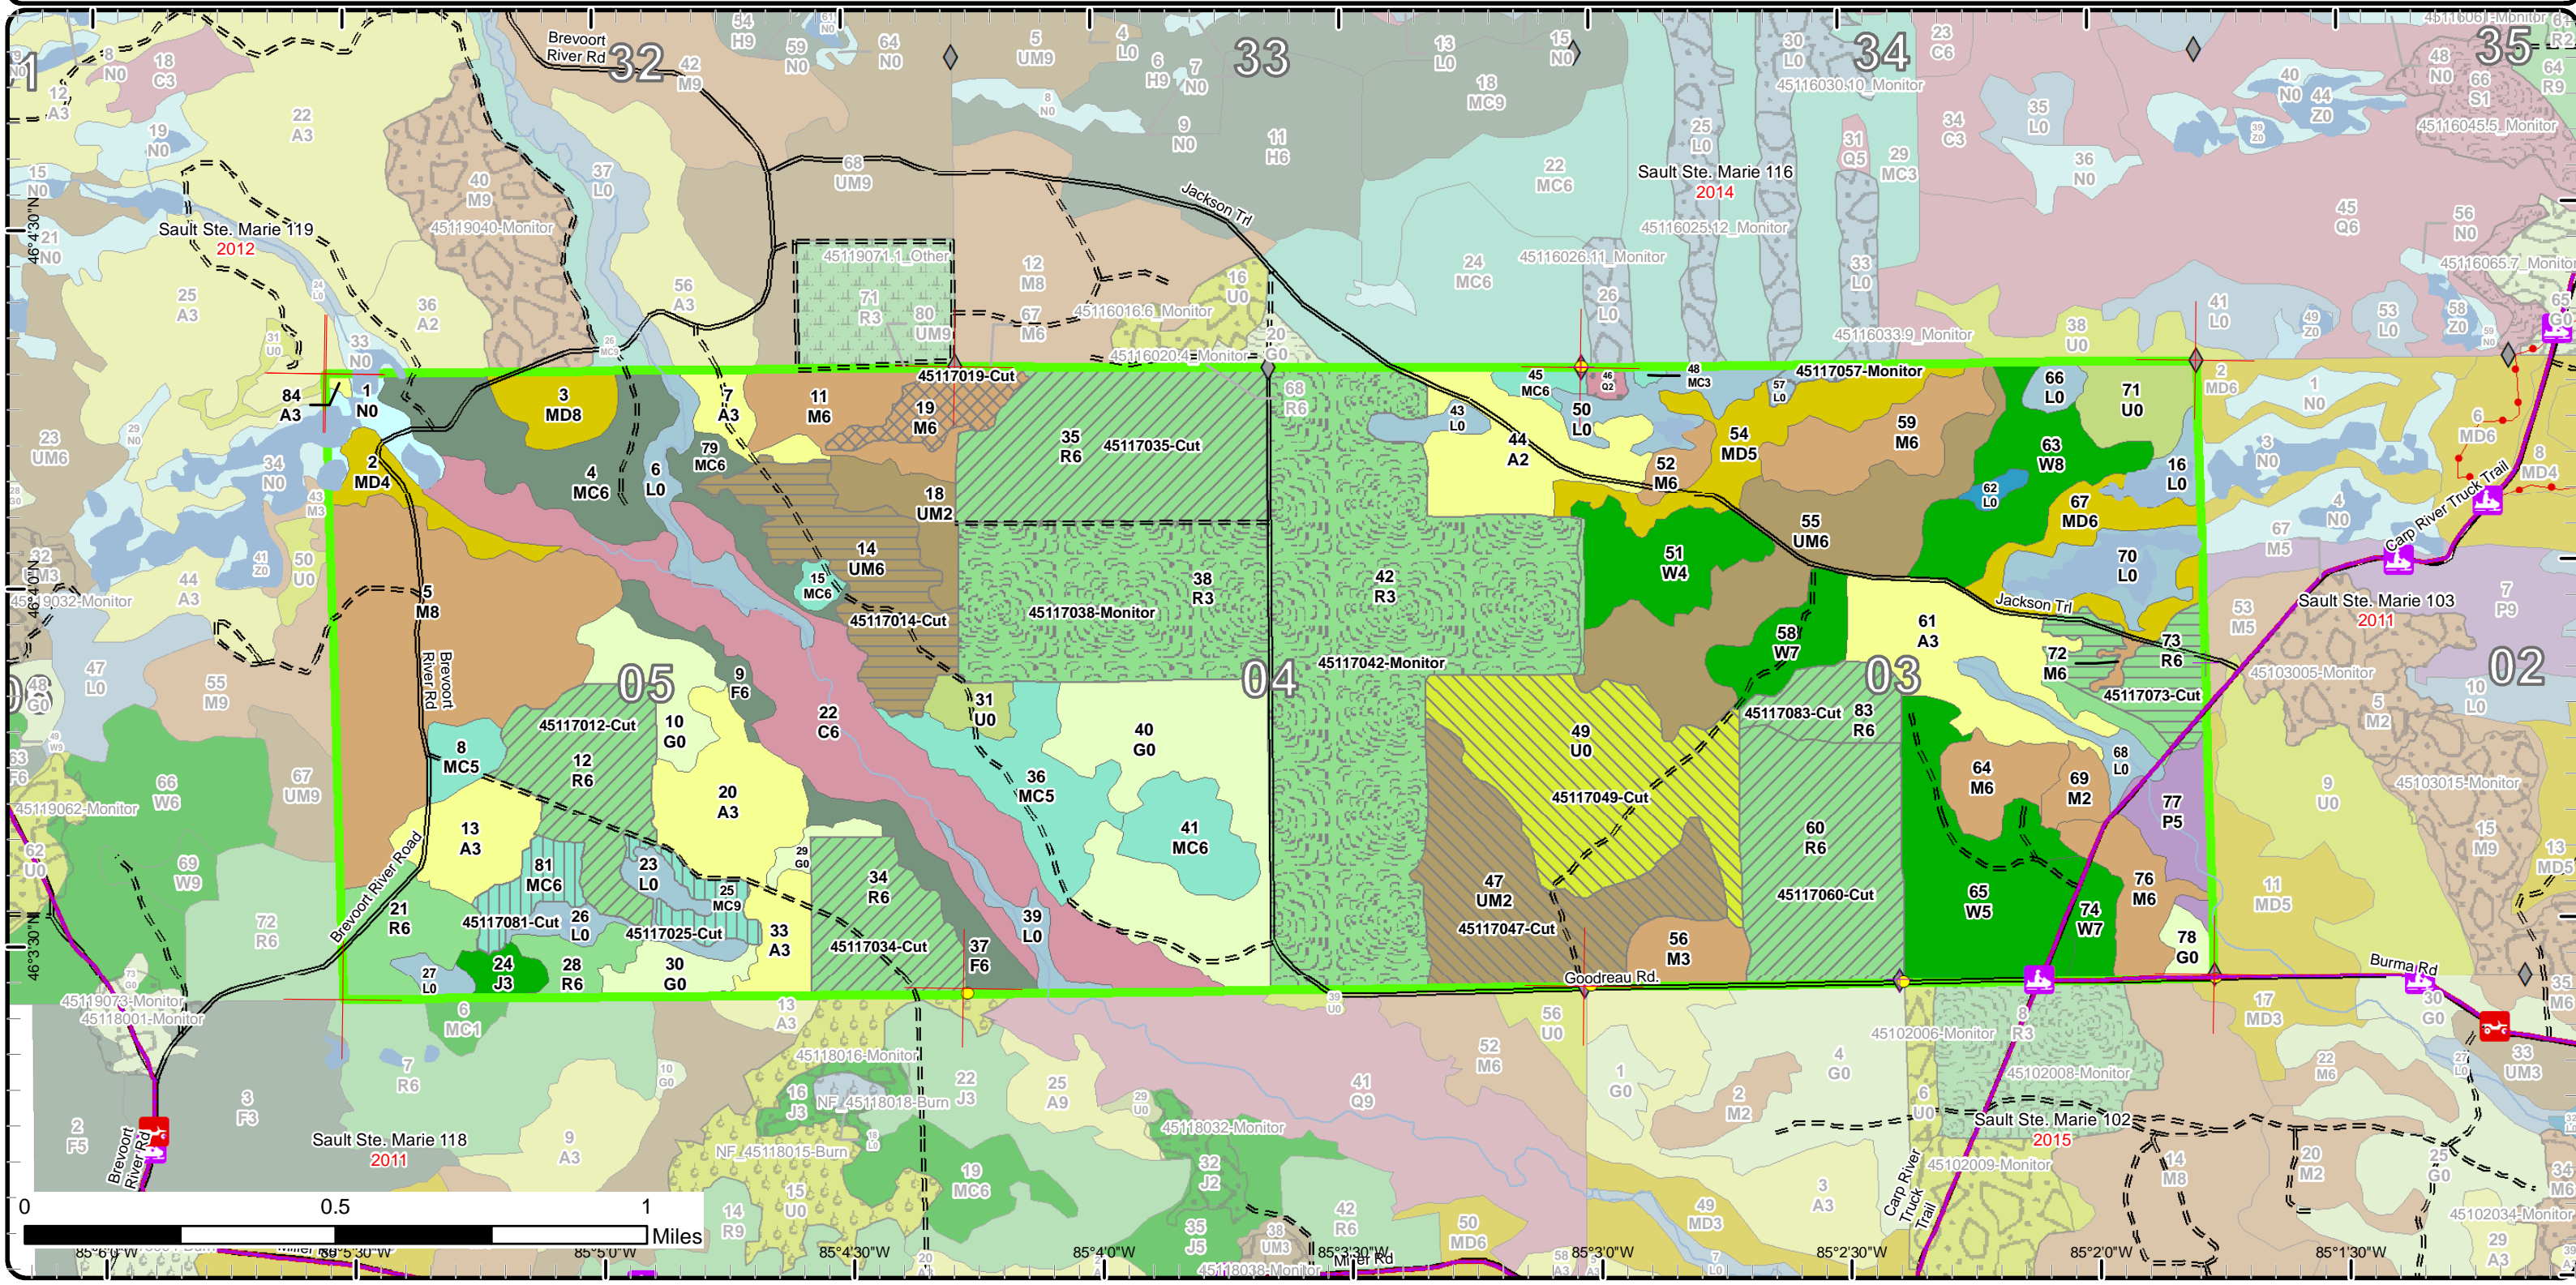

- Base feature information, stand boundaries, cover types, and numbers**
- Proposed treatments**
- Site condition boundaries**
- Details on the road access system**

## Report 5 – PROPOSED SPECIAL CONSERVATION AREA\* (SCA) DETAILS

\* This is a partial list of SCAs for this compartment. Not included are those areas identified under other Department initiatives (Natural Rivers, Deer Wintering Areas, etc.). Those will be identified in separate, future map and report products.

SCA Name	SCA Category	Detail Type	Recommendation	Acres
----------	--------------	-------------	----------------	-------

## Report 6 – EXISTING SPECIAL CONSERVATION AREA DETAILS

\* This is a list of SCA's for this compartment along with a 1/4 mile buffer surrounding the compartment. Refer to the Special Conservation Area Map for locations of the below listed Conservation Areas.

ERA = Ecological Reference Area  
 HCVA = High Conservation Value Area  
 SCA = Special Conservation Area

Conservation Area	Type	Description
SCA	Cold Water Stream	A coldwater stream has temperature and dissolved oxygen conditions that allow naturally-reproduced or stocked trout populations and those of other coldwater fish species (e.g., slimy sculpin) to persist from year to year. Coldwater streams in Michigan typically provide these conditions due to substantial contributions of groundwater to their stream flows. Such streams are established by Director's action and designated as trout resources by Fisheries Order 210.
SCA	Habitat Area	An area that provide some specific need for the life cycle of wildlife species, including State Wildlife Areas and Waterfowl Production Areas, deer wintering complexes in lowland conifer communities, grassland openings and savannas. Habitat areas are distinct from critical habitat designated for recovery of endangered or threatened species (such as Kirtland's warbler or piping plover areas) in that they are more general in nature, are not primarily associated with threatened or endangered species, and are not covered by species recovery plans that are developed in cooperation with Federal agencies.
SCA	Riparian Area	A transitional area between aquatic and terrestrial ecosystems in which the terrestrial ecosystem influences the aquatic ecosystem and vice-versa. Because of the unique conditions adjacent to lakes, streams and open water wetlands, riparian areas harbor a high diversity of plants and wildlife. Riparian communities are ecologically and socially significant in their effects on water quality and quantity, as well as aesthetics, habitat, bank stability, timber production, and their contribution to overall biodiversity.
ERA	Ecological Reference Areas	Ecological Reference Areas (ERAs) are high quality examples of natural communities that have been identified as Element Occurrences (EOs) by the Michigan Natural Features Inventory (MNFI) within the context of their natural community classification system. Element Occurrences with viability ranks of A (Excellent) or B (Good) and a Global (G) or State (S) element (rarity) ranking of endangered (1), threatened (2), or rare (3) serve as an initial base of ERAs. They may be located upon any ownership in the State. The system is comprised of individual or associations of natural community types that are managed for restoration and maintenance of natural ecological processes and values. The public may submit recommendations for lands as ERAs using the DNR Conservation Area Recommendation Form.

Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
4191 - Mixed Upland Deciduous with Conifer	Poletimber Poor	11.4	17	Immature	Stand is unit in 'Missle tube Shelterwood'.
4191 - Mixed Upland Deciduous with Conifer	Sawtimber Medium	13.0	71	51-80	Cut in 99 as 'Missle Tube Shelterwood. Some clumps of hemlock and cedar.
42380 - Non Pine Upland Conifer, Mixed Deciduous	Poletimber Well	40.1	36	141-170	Pole sized mixed stand. Heavy to cedar in some places. Retain this entry and revisit in 10 years. Balsam is still relatively small and no sign of SBW.
4112 - Maple, Beech, Cherry Association	Sawtimber Medium	100.1	82	51-80	Beech was salvaged in 2014. Variable basal area. Mostly red maple with scattered conifer/white pine.
4134 - Aspen, Spruce/Fir	Sapling Well	9.0	33	Immature	
429 - Mixed Upland Conifers	Poletimber Medium	8.0	53	1-50	Old opening almost filled in completely, lots of age classes. Decent b. berry crop. East side is better stocked with white pine.
42340 - Upland Spruce/Fir	Poletimber Well	8.0	56	Unspecified	
4112 - Maple, Beech, Cherry Association	Poletimber Well	22.1	93	1-50	Was a unit is Missle Tube Shelterwood a 99 sale.
42110 - Planted Red Pine	Poletimber Well	40.1	55	171-200	Was cut in 99 as a unit of 'Good Row Pine'. Good looking pine, ready for second thin.
4136 - Aspen, Mixed Conifer	Sapling Well	20.3	36	141-170	Thick upland mix, pole/sapling.
4319 - Mixed Upland Forest	Poletimber Well	43.9	76	141-170	Stand was prescribed last entry as 45-103-09-01. Brevoort River Mix. Carry on treatment that was previously prescribed. Nice pole stand of upland spruce, aspen, red maple mix.
429 - Mixed Upland Conifers	Poletimber Well	2.9	30	51-80	Pocket of small mixed conifer.
4319 - Mixed Upland Forest	Sapling Medium	14.2	34	1-50	Lots of B. Berries would be nice to burn and maintain as an opening. Some pockets of mature timber.
4112 - Maple, Beech, Cherry Association	Poletimber Well	14.1	86	81-110	Stand was prescribed and set up last entry, but never cut as part of Brevort River Mix sale #45-103-09-01. Re-prescribe this entry.
4134 - Aspen, Spruce/Fir	Sapling Well	31.3	36		
42110 - Planted Red Pine	Poletimber Well	21.6	55	111-140	Stand was thinned in 2001. #45-116-01-01 "Twisted Blister". Looks good, still released and relatively small diameters. Do not treat at this time, but consider adding treatment if adjacent stands in other compartments are prescribed in future.

	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
22	6120 - Lowland Cedar	Poletimber Well	97.7	125	Unspecified	Fir and spruce on edges of stand turns to cedar and tag alder. Leave for river buffer.
24	42220 - Natural Jack Pine	Sapling Well	5.9	17	Immature	Stand was cut in 2001. #45-116-01-01 "Twisted Blister". Jack Pine regeneration mixed with some Birch, Cherry, and a few Aspen.
25	429 - Mixed Upland Conifers	Sawtimber Well	8.9	89	141-170	White pine stand with some mix of spruce and birch. Thin down to manage for white pine. Straight, good quality wp.
28	42110 - Planted Red Pine	Poletimber Well	9.1	55	141-170	Stand was thinned in 2001. #45-116-01-01 "Twisted Blister". Looks good, still released and relatively small diameters. Do not treat at this time, but consider adding treatment if adjacent stands in other compartments are prescribed in future.
33	4134 - Aspen, Spruce/Fir	Sapling Well	12.2	23		
34	42110 - Planted Red Pine	Poletimber Well	33.7	55	141-170	Thinned in 99 "Good Row Pine". Good looking red pine, ready for a second thinning.
35	42110 - Planted Red Pine	Poletimber Well	73.6	58	111-140	Was thinned in 99 'Mike's Hike'. Stocking is more variable on the west 40. Thinned in '09 "Nick of time pine"
36	429 - Mixed Upland Conifers	Poletimber Medium	31.8	48	1-50	Nice pole stand of mixed upland conifer. Still relatively small diameters. No sign of SBW. Hold for future as harvesting large adjacent stand this entry.
37	42340 - Upland Spruce/Fir	Poletimber Well	16.0	42	111-140	Mixed stand of conifer fringing the river flood plain. Fairly high bluff in places.
38	42110 - Planted Red Pine	Sapling Well	82.0	14	Immature	Stand was cut in 2004 #44-024-99-01 "Mikes Hike". Planted tor RP in 2004.
41	429 - Mixed Upland Conifers	Poletimber Well	18.8	51	81-110	Spruce/fir on the edges. Heavy to aspen on the east end and turn to a filled in opening on the west with spruce/fir/pine. Very randomly variable mixed stand. Healthy and doing well, hold this entry for age class. Consider harvesting with adjacent stand 36 in future.
42	42110 - Planted Red Pine	Sapling Well	200.3	12	Immature	Stand was cut in 2006. #44-023-99-01 "Stand-Off Red Pine". Planted to RP in 2006
44	4130 - Aspen	Sapling Medium	35.2	18	Unspecified	Cut in 2000 'Old Oil Pan' 45-029-99-01.
45	429 - Mixed Upland Conifers	Poletimber Well	4.3	79	51-80	This stand was clearcut 22 years ago and the white pine was left. The stand is now a white pine stand with a fair amount of white pine regeneration.

Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
6129 - Mixed Coniferous Lowland Forest	Sapling Medium	1.9	9		Cut in 2009
4319 - Mixed Upland Forest	Sapling Medium	64.5	26	1-50	Lots of B. berries. Old opening that is filling in, lots of age classes. West end of stand is older and larger.
429 - Mixed Upland Conifers	Sapling Well	0.8	34	Immature	Small point that is part of larger stand in adjacent compartment.
42200 - Natural White Pine	Poletimber Poor	25.7	82	51-80	Stand was cut in 2012 #45-102-09-01 Snowed in Mix.
4112 - Maple, Beech, Cherry Association	Poletimber Well	5.5	56	81-110	Stand of small poles, with a lot of brush. Basal area isn't that high. Let the trees put on some size and check the basal area again next entry.
4191 - Mixed Upland Deciduous with Conifer	Poletimber Medium	28.3	54	1-50	
4319 - Mixed Upland Forest	Poletimber Well	62.7	75	51-80	Poor quality pole stand. Northern parts of the stand has been thinned. Has a decent component of W.P. Overall basal area is not that high. Leave for age class this entry and continue to look at in the future for managing the White Pine.
4110 - Sugar Maple Association	Sapling Well	13.0	18	Immature	Cut in 2000 with 'Old Oil Pan'
42200 - Natural White Pine	Sawtimber Poor	16.4	91	81-110	Stand of White pine with understory of mixed everything coming up underneath. Leave this stand go as a natural white pine stand until understory is big enough to harvest.
4112 - Maple, Beech, Cherry Association	Poletimber Well	22.8	93	51-80	Stand was thinned in 2013. #45-102-09-01 Snowed In Mix.
42110 - Planted Red Pine	Poletimber Well	65.6	55	81-110	Stand was cut in 2008 with Jack Pine removed. 'Bad Row Pine' 45-105-04-01. Thin red pine again this entry.
4130 - Aspen	Sapling Well	39.3	26		aspen about 20' tall.
42200 - Natural White Pine	Sawtimber Medium	31.7	98	51-80	Stand was cut in 2001. 45-120-01-01. "Licensed Blind White Pine". All but White Pine and Hemlock Cut.
4112 - Maple, Beech, Cherry Association	Poletimber Well	14.2	93	51-80	Thinned 2010
42200 - Natural White Pine	Poletimber Medium	53.3	57	1-50	Most of stand is an opening that has filled in. Southern part of stand was a Seed tree unit of 'Licensed Blind White Pine'
4199 - Other Mixed Upland Deciduous	Poletimber Well	20.2	82	81-110	Leave for buffer around the Fen. Smaller diameters in most places. Good buffer for fen.

Stand	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
69	4119 - Mixed Northern Hardwoods	Sapling Medium	6.7	7	Immature	Stand was an R9 harvested in 2011 45-101-09-01. Owen Sixteen. It was prescribed to regenerate naturally and has filled in nicely with hardwood/aspens mix. Residual Red Pine left as leave trees remain and look good.
72	4112 - Maple, Beech, Cherry Association	Poletimber Well	1.7	76	51-80	
73	42110 - Planted Red Pine	Poletimber Well	26.7	79	141-170	Final Harvest this stand this entry. Heavy brush underneath overall.
74	42200 - Natural White Pine	Sawtimber Poor	9.6	96	1-50	Cut in 99 'Licensed Blind White Pine'
76	4112 - Maple, Beech, Cherry Association	Poletimber Well	16.8	84	51-80	Thinned 2010. #45-101-09-01. Owen Sixteen. Good looking Hardwood mixed with some white pine and other. Regeneration is shooting up and looks good. There is maple and White pine regeneration as well as aspen in places.
77	6112 - Lowland Aspen	Poletimber Medium	15.5	60	Unspecified	Intermittent drainages through out stand. Pockets of high ground with Red ,white pine, and aspen.
79	42390 - Mixed Non-Pine Upland Conifers	Poletimber Well	12.7	87	81-110	Smaller pole sized stand of mixed conifer on transitional ground much lower than surrounding. Some areas of tag alder near edge.
81	429 - Mixed Upland Conifers	Poletimber Well	10.5	75	81-110	Originally part of stand 17 which was cut as part of Brevort River Mix sale #45-103-09-01. This portion was not cut. Prescribe as previous entry.
83	42110 - Planted Red Pine	Poletimber Well	16.5	55	141-170	
84	4134 - Aspen, Spruce/Fir	Sapling Well	0.8	34	Immature	This stand was cut at the same time as adjacent stand in comp. 119. The spruce and balsam are much heavier within this stand. The regen as a whole is doing good.
