

Compartment Review Presentation

Traverse City Forest Management Unit

Former Compartment 61012

Entry Year 2019

Inland Township, Benzie County

Stand Examiner: Tim Webb

Legal Description: T26N R13W, sections 1, 3, 15

The three disjunct parcels of state forest land comprising the former compartment 61012, corresponding to the three sections listed above, have recently been reapportioned into adjacent compartments for more efficient management. However, because these lands were due for review along with other year-of-entry 2019 compartments, they were re-inventoried during the current review cycle. All forest cover type data for the stands within these parcels have been updated. Subsequently, we are proposing forest management prescriptions within two of these parcels for inclusion in the 2019 plan of work, those being state land in sections 1 and 15. Thus, these prescriptions, if approved, will be out of their normal year-of-entry based on their new compartment designations.

Maps showing forest cover types and proposed treatments have been developed for these 2 parcels. These proposed prescriptions are being posted for public review along with the other 2019 compartments in the Traverse City Forest Management Unit. Public input received, including any from the July 12, 2017 Open House to be held at the Traverse City Customer Service Center, will be considered during the final Compartment Review scheduled for August 3, 2017.
