### **SALE STATISTICS**

Volumes were calculated in cubic feet using the Michigan taper model. Cubic foot volume includes all wood inside bark for the product indicated. For display purposes, cubic feet were converted to cords and MBF using a simple conversion factor, e.g. 79 cubic feet per cord and 185 cubic feet per MBF. The cubic foot volumes are precise; the cords and MBF volumes are not. Cubic foot volume cannot be directly converted to cords or boards with precision.

**SALE VOLUMES**

The total estimated sale volume may not equal the sum of the species/products due to the nature of statistical calculations associated with double sampling methodology.

VOLUME			STATISTICAL RANGE IN CORDS	
TOTAL CUBIC FEET	TOTAL CORDS	PERCENT ERROR	MINIMUM	MAXIMUM
281,845	3,568	10.88%	3,179	3,956

**VDU VOLUMES**

A VDU is a Volume Determination Unit. Volumes and their associated statistics are calculated at the VDU level and summarized to the sale level. There is often a one to one relationship between a VDU and a Payment Unit, but not always, depending on the cruise design. Refer to the VDU TO PAYMENT UNIT table.

	VOLUME			RANGE IN CORDS	
VDU	TOTAL CUBIC FEET	TOTAL CORDS	PERCENT ERROR	MINIMUM	MAXIMUM

<b>TOTAL:</b>	<b>281,845</b>	<b>3,568</b>		<b>2,605</b>	<b>4,530</b>

**VDU TO PAYMENT UNIT**

When a VDU is associated with more than one Payment Unit (PU), the VDU volumes are assigned to the PU based on acres of the VDU within the PU.

### 4 - Transportation

#### 4.1 - Construction

##### 4.1.5 - Culverts (5/14)

Roads will require the installation of culverts for cross drainage or at natural drainage-ways. If culverts are needed in these locations, their placement will be specified by the Sale Administrator, and they shall be installed prior to hauling. The culverts shall be new, corrugated metal or plastic HDPE dual walled culverts. Culverts will be a minimum of 18 inches in diameter and 24 feet in length. All culverts shall be permanently set into place. Soils shall be maintained and left in a non-erodible condition as specified in the BMP manual using methods directed and approved by the Sale Administrator. No stream crossing permits are required. The Purchaser shall supply culverts and facilitate or carry out their installation using approved BMP methods.

##### 4.1.7 - Road Closure (10/11)

All new roads built into the sale must be blocked to vehicle traffic upon completion of the sale. Overgrown roads that are reopened shall be considered new roads. In general, this will require constructing a four (4') foot high berm of stumps and logs covered with earth. Stumps and brush must be placed along the remainder of the trail. These roads must be rendered impassable to cars and trucks. All stumps from road building and landing construction must be reserved to block any newly constructed roads upon completion of the sale. These stumps must be scattered along the road system to prohibit vehicular movement. Temporary berms may be required if no sale activity occurs for 30 or more consecutive days. Contact the Sale Administrator for specific details of design and placement.

##### 4.1.8 - Road Work (1) (8/07)

The following road work is required: The Purchaser must purchase and install 4 new culverts. The culverts will be installed at

the locations shown on the Timber Sale Roadwork Map. The Purchaser must also haul and spread ~1010 cubic yards of pit run gravel at locations shown on the Timber Sale Roadwork Map. The Purchaser must ditch part of the road shown on the Timber Sale Roadwork map. A minimum of 12 inches of pit run gravel must be placed over the culverts. Contact the Sale Administrator for possible gravel sources. All road work must be completed prior to the commencement of harvest operations.

##### 4.2.4 - Grading (10/16)

For completion of the sale, state forest roads must be graded. In general, this will require a road grader or bulldozer to shape up the roads after forest products have been hauled off site. This includes cleaning of drainage areas, grading, crowning and filling with gravel, if necessary. The grading equipment to be used must be approved by the Unit Manager or his/her representative.

The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.
