Dickinson County, Advertised Price $155,603.95, 422.6 Acres, Aspen, Hardwood.

SALE NOTE: Extensive road work is required on this sale. The advertised price has been reduced by the estimate cost of this road work to off-set the additional expense.NOTE: The Degroot road bridge crossing the North Branch of the Ford river CANNOT be used for logging trucks (including empty trucks) due to DCRC bridge weight restrictions. It is strongly suggested bidders evaluate all roads/access as significant road work will be necessary for hauling. Two 18" x 24 foot culverts and a half mile of gravel is required. Additional culverts/timber mat crossings/gravel will likely be needed. Gravel will be available from Buckler Road. Sale administrator has contact info for private land owners, which is preferred for access into Units 14-16. Any permits needed to cross streams on private land will be Purchaser's responsibility.

Access may be through private land.

4. If no cutting takes place, the 10% down payment will not be refunded.
5. Operations on the contract issued will terminate on 12/31/2030.

SALE STATISTICS

Volumes were calculated in cubic feet using the Michigan taper model. Cubic foot volume includes all wood inside bark for the product indicated. For display purposes, cubic feet were converted to cords and MBF using a simple conversion factor, e.g. 79 cubic feet per cord and 185 cubic feet per MBF. The cubic foot volumes are precise; the cords and MBF volumes are not. Cubic foot volume cannot be directly converted to cords or boards with precision.

SALE VOLUMES

The total estimated sale volume may not equal the sum of the species/products due to the nature of statistical calculations associated with double sampling methodology.

VOLUME			STATISTICAL RANGE IN CORDS	
TOTAL CUBIC FEET	TOTAL CORDS	PERCENT ERROR	MINIMUM	MAXIMUM
660,685	8,363	8.11%	7,685	9,041

VDU VOLUMES

A VDU is a Volume Determination Unit. Volumes and their associated statistics are calculated at the VDU level and summarized to the sale level. There is often a one to one relationship between a VDU and a Payment Unit, but not always, depending on the cruise design. Refer to the VDU TO PAYMENT UNIT table.

Sale Specific Conditions & Requirements

Sale Name: The Oregon Trail **Sale Number: 12-013-26 Seq#: 1**

1 - Sale Area

1.2 - Boundaries

1.2.1 - Painted Boundaries (9/19)
The sale boundary and Payment Unit boundaries are marked and identified by blue, red and yellow paint. Exterior sale boundary lines against private property are marked with blue paint. Exterior sale boundary lines against state are marked with red paint. Interior Payment Unit boundaries are marked with yellow paint. Retention patches are marked with red paint; no harvesting activities may occur within these areas. The painted boundary line trees are not Included Timber and are to be protected unless marked with orange paint. Yellow painted trees designating an interior Payment Unit boundary are only to be cut when all surrounding Payment Units have been paid.

2 - Timber Specifications

2.1 - Included Timber

2.1.1 - Clearcut Unit(s) with Unmerchantable Trees (6/14)
Within Payment Unit(s) 1, 6-9, 11 & 13, cut all trees that are three (3) inches or more at DBH, except pine, cedar, oak and hemlock (if found).
In addition, green painted trees in Units 1 and 11 are to be retained.

2.1.3 - Cut Tree Marked Unit(s) (12/08)
Within Payment Unit(s) 2-5, 10, 12, and 14-16, all trees are designated for cutting when marked with orange paint above and below stump height, regardless of merchantability. All ash will be designated for harvest due to EAB.

3 - Payments

3.3 - Pre-measured Sales

3.3.4 - Dividing Payment Units (7/14)
Payment Unit(s) 1 may be divided at the request of the Purchaser and upon approval of the Unit Manager. Dividing Payment Units is a contract modification which requires a Timber Sale Contract Amendment. There will be only one division per Payment Unit.

4 - Transportation

4.1 - Construction

4.1.2 - Stream Crossings, Specific (3/11)
Access into Unit 11 will require the installation of a culvert or timber mat bridge. This installation will be performed in accordance with the specifications on the appropriate permits which shall be provided by the DNR.

4.1.4 - Timber Removed for Construction (3/23)
Trees cut or damaged in the process of pre-approved road, landing, or skid trail construction will be decked in an area separate from other Designated Timber and not removed until measured by the Sale Administrator. Payment will be made at contract prices or average prices, if not on the contract.

4.1.5 - Culverts (5/14)
Roads may require the installation of culverts or timber mat bridges for cross drainage or at natural drainage-ways. If culverts are needed in these locations, their placement will be specified by the Sale Administrator, and they shall be installed prior to hauling. The culverts shall be new, corrugated metal or plastic gauge. Culverts will be a minimum of 12 inches in diameter and 24 feet in length.

4.1.6 - Road Construction (4/24)
Construction of new roads or improvements of existing roads shall be done in such a way as to minimize the environmental

and visual impacts. Merchantable trees shall be cut and utilized unless otherwise directed. Non-merchantable trees shall be severed and laid flat on the ground. Slash shall be scattered, not left in windrows, and kept a minimum of 10 feet back from the road edge. Stumps shall be set upright, not left on edge, and be moved at least 5 feet away from the road edge. Disturbed soil shall be feathered into the woods and not left in berms or windrows.

4.1.7 - Road Closure (10/11)
All new roads built into the sale must be blocked to vehicle traffic upon completion of the sale. Overgrown roads that are reopened shall be considered new roads. In general, this will require constructing a four (4') foot high berm of stumps and logs covered with earth. Contact the Sale Administrator for specific details of design and placement.

4.1.8 - Road Work (1) (8/07)
The following road work is required: the Purchaser must purchase and install 2 new, 18 inch by 24 foot corrugated steel or plastic HDPE dual walled culverts. A minimum of 12 inches of pit run gravel must be placed over the culverts. The culverts will be installed at the locations shown on the Road Work map for this sale.

In addition, the Purchaser must also haul and spread ~250 cubic yards of pit run gravel; at least half of it must be placed in location shown on Road Work map. The rest must be used on the Vicenzie/Degroot road, at Purchasers discretion. This road work must be completed prior to the commencement of harvest operations.

Please note: depending on access used, additional gravel, culverts and/or timber mat crossings will likely be necessary. Inspect all haul routes/access.
Gravel is available from the Buckler Road gravel pit and possibly other smaller pits.

4.2 - Maintenance

4.2.1 - Hauling Restriction (12/08)
Hauling may be restricted on forest roads by the Unit Manager or his/her representative. The restriction may occur during spring breakup or prolonged wet weather conditions.

4.2.4 - Grading (10/16)
For completion of the sale, state forest roads must be graded. In general, this will require a road grader or bulldozer to shape up the roads after forest products have been hauled off site. This includes cleaning of drainage areas, grading, crowning and filling with gravel, if necessary. The grading equipment to be used must be approved by the Unit Manager or his/her representative.

4.4 - Access

4.4.1 - Private property access (3/11)
Permission for access across private land is the responsibility of the Purchaser. Sale administrator can provide contact information. While it is preferred to utilize private property to access Units 14-16, there will be roadwork (culvert/timber mats) necessary on private to access, which land owner is agreeable to doing. Please inspect this crossing prior to bidding.

4.4.4 - Restricted Access (10/05)
NOTE: The Degroot road bridge crossing the North Branch of the Ford river CANNOT be used for logging trucks (including empty trucks) due to bridge weight restrictions.

5 - Operations

5.2 - Conduct of Operations

5.2.3 - Operating Restrictions

5.2.3.3 - Bark Slippage Restriction (3/09)
Within Payment Unit(s) #3-5, 10, 12, 14-16, unless changed by written agreement,cutting and skidding are not permitted during the period of April 15 to July 15. This restriction is because of bark slippage.

5.2.32 - Decking/Landing Restoration (9/13)
All decking and landing areas must have the surface area restored to a condition equal to or better than before. This is to ensure the proper regeneration of the stand. Wood debris, chips and "cookies" from trimmings must be removed or scattered

away from landing and loading areas and may not be windrowed on the edge.

5.4 - Soil Protection

5.4.1 - Rutting Restriction, General (7/16)
Operations are to cease immediately if equipment and weather conditions result in rutting of roads and/or skid trails which are 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

6 - Safety and Fire Prevention

6.2 - Signing

6.2.1 - Road Posting (10/20)
The Purchaser is responsible for posting and maintaining caution signs on Degroot/Vicenzie roads prior to beginning operations. The road must be posted at appropriate distances from the Sale Area to warn of logging activity and truck traffic. Signs must be removed when harvest operations are suspended or completed. The Purchaser will provide these signs.
