Comments: Stand 29 was failed regeneration slated to be planted with Stand 31 post harvest. Stand 29 needs roller chopping of 6 ft plus red maple stump sprouts. In Stand 31, red pine are to be row planted under the retained oak from crown drip edge to drip edge, per TMS, with the long term goal of conversion back to oak. Residual oak crown spacing is tighter than desired in the southern half of Stand 31. All operations in Stand 31 should occur outside the April 15 to July 15 oak wilt window as necessary for minimizing the chances of spreading of oak wilt.
