WATER: Hoop Lake within 500 ft to the west		
HAL: No known occurrences 9/25/2024		
MNFI: Hoop Lake Bog ERA 350 ft to the west. Red Shoulder Hawk last obs 1989		
Drafted & Reviewed:09/25/2024 TKG		

Implementation Notes

Comments: Parent stand contained high density of Oak and Sugar Maple in the sub-canopy. The adjacent sale has not sold yet but is an Aspen MO. Aspen regen may encroach into planting. Overall flat terrain, sale was not chipped; tops were lopped and scattered. Few scattered larger diameter hardwood stumps that were left high (3-4 ft) on purpose to help see during cultivation related activities. There is an full time residence 200 ft to the south of the treatment.

MIFI Start Date: 10/01/2024
