MNFI: None		
Drafted & Reviewed: 01/15/2026 DJM		Do not trench the no spray, no trench, no plant areas that should be identified during sale set up.

Implementation Notes

Comments: This stand was cut in spring of 2025. The stump heights meet specs except for a few very large oak stumps. This job was chipped and should not require roller chopping. The treatment included leaving some oak/pine areas (3-5) and incorporating some oak into the planting. There are some moderate hills in the west and north west although most of the stand is gentle sloped or flat. Access can be from the north off Old State Road or from Chub Lake Rd on the East side of the treatment.

Approved Methods: Trench, Spray and Plant to RP at standard spacing per TMS specifications.

MIFI Start Date: 10/01/2025
