Trench & plant RP at standard spacing. Additional treatments may include roller-chopping and herbicide spraying.

Timbersale number: 52-124-16-01

Sale admin staff: John St. Pierre

Harvesting completed by: Unit cut Nov-Dec '19, Northern Timberlands

Acres: 61.9

Contract TCR date: 1-15-2021

Comments:

Access provided by Trail 76, south of Wildwood Rd. The former sled trail is prone to seasonal water run-off issues. Terrain in prep area is flat w/rubicon sands. Aspen whips, 5-10ft, are regenerating in areas, stocking ranges A1 to A3. The A3 areas tend to exist west of the ATV trail. About 2-3BA (average) of legacy sized WP and RO were left/protected within treatment area. A few areas w/clumps of JP snags present too. South boundary is briefly purple/green in west (PU line & nest buffer), then just green (PU line). Both colors now very faded. Prescribed by Roell, prep/admin by JSP.
