Trench & plant RP at standard spacing. Leave open existing roads within the planting area. Additional treatments may include chopping & herbicide.

Timbersale number: 72-026-19
Sale admin staff: McClarren

Harvesting completed by: Fall 2021, Spring 2022

Contract TCR date: 7/21/2022

Comments:

Stand 406 (pre-harvest was multiple stands containing northern hardwoods, cherry openings, and jack pine) was harvested fall of 2021. Stand 75 was a scotch pine plantation harvested during break-up in 2022. There is pipeline that runs through the east side of stand 75. Stand 37 is 1.5 acres of scotch pine that was not included in the harvest but is supposed to be planted at the same time as stand 406. Stand 37 is to be mulched in 2022. Stand 405 was not included in the harvest area but only contains a few scattered cherry trees and should be easily plantable. Stand 405's treatment couldn't be merged with stand 406 in MiFI. Sale was low stumped and chipped.
