Covertype Objective: Planted Red Pine $\quad$ Acres: 73
Approved Methods:
Trench \& plant RP at standard spacing. Additional treatments may include roller chopping \& herbicide.
Leave open existing roads within the planting area.
Timbersale number: 72-042-19
Sale admin staff: Ewald
Harvesting completed by: Dec 2022

## Contract TCR date: 01/12/2023

## Comments:

Stands 14 \& 20 were initially cut in spring of 2022 except for a tree-length buffer along the perimeter. The loggers then moved back in and cut the buffers in the last quarter of 2022. Stumps were cut low and the sale was chipped. The amount of riparian interface varies with the level of beaver activity on Carter Creek and its associated ponds; any needed set-backs from water features will be flagged-in before trenching begins.
