Approved Methods:

Rollerchop, trench & plant RP at standard spacing. Plant through all skid trails associated with logging operations. Additional treatments may include herbicide application.

Timbersale number: 72-003-12, 72-035-20, 72-035-19

Sale admin staff: McClarren

Harvesting completed by: 2014, 2021, 2023

Contract TCR date: 08/03/23

Comments:

Stand 3 was originally three stands merged following harvest: stand 23 cut in 2014, stand 36 cut in 2021, & part of stand 22 cut in 2023. Topography is flat. The mapped interior roads are currently proposed for closure; if approved by LUOD this winter, close those roads by trenching through them. Most of the stand will need to be roller-chopped to set back cherry brush. The two landings created for the most recent harvest had accumulated slash that was spread out but would also benefit from being roller-chopped prior to trenching.
