| Town 26N | Range 1W | Sections 4 | Cover Type Objective: Planted RP | Acres: 47 | |

Additional Instructions & Notes

Natural regen failed across most of the FTP area so the backup planting plan will be carried out. The FTP excludes patches of A3 that established on the edges of stand 79. Also, on the edge of stand 64, do not plant within the former wellsite (it has a Wildlife Opening objective). Leave open the mapped traversable roads. Buried utilities follow most of the roads. A few legacy trees were left within the planting area.

Prescription

Approved Methods:

Stand 64: Trench & plant RP where regen failed.

Stand 79: Trench, spray, & plant RP outside of the A3 patches.
