Implementation Notes

Comments: FTP Name: Ice-Salvage Garden

Theses stands were salvage harvested fall/winter 2025. On site meeting with TMS, UM, Fire Sup, Fire officers, and Foresters determined next steps in summer of 26. Significant slash left behind in units. C213 stand 28 will be burned to reduce slash before flat planting. Asses burn area for herbicide needs following burn. There;s a 2 track on the east side of stand 28 that is private and can't be utilized for burn ops. C245 Std 15 and C244 Std 18 will be skidder sprayed due to restricted air space then flat planted. Some skinny fingers have been removed from the treatment areas.
