Implementation Notes

Comments: Treatment is accessed From Glennie and Bissonette Roads West of M-65. A good turn around at the end of the treatment on Glennie Rd is a good spot for a low boy. Site is flat, and harvested by whole tree chipping operation. Note: At time of drafting FTP approximately 1/2 of the treatment area has been harvested. this sale is still under contract and the producer has confirmed they intend to stay and finish at least this unit prior to April 15th. Good access along north and south of unit. Trench through landings and temp access roads within unit. Do not trench or plant East of the treatment area (orange boundary marks)

Approved Methods: Trench site and plant JP per USFS specifications (1089 TPA).
Additional Treatments: 1 year and 3 year artificial regen monitoring.
