FTP C53-544
Compartment 62
Stands 31, 89, 153, 167, 132, 136
163 treatment acres

Objective: Planted red pine.

Methods: Rollerchop as needed at the operators discretion. Islands of red pine regeneration have been excluded from treatment boundaries. Inclusions of aspen/pine regeneration have also been excluded along the edges. Trench then plant to red pine. Push trench line all the way to treatment edges. No follow-up herbicide. Pre-commercial thin as necessary to reduce competition.

Comments:
Stand 31 - 55 acres. Clearcut in 2023, tops chipped. Rollerchop as needed. Islands of good red pine regeneration have been excluded from the treatment boundary and should not be rollerchopped. Aspen inclusions have also been excluded from the edges of the treatment. Flat to gently rolling terrain. Small amount of red oak and cherry residual. Residual slash and high stumps are minimal. Access via a locked gate.
Stand 89 - 22.1 acres. Clearcut in 2024, tops chipped. Rollerchop as needed. High stumps and residual slash are minimal. Flat to gently rolling terrain. One island of pine regeneration has been excluded from the treatment and should not be rollerchopped. No residual merchantable trees. Access via a locked gate.
Stand 132 - 5 acres. Clearcut in 2023, tops not chipped. Rollerchop as needed. Scattered high stumps are present. Moderate amounts of slash. The north half of the stand sits on a south facing side-slope. A handful of residual maple at the west end. Access via an open state forest road.
Stand 136 - 19.1 acres. Clearcut in 2023, tops were chipped. Rollerchop as needed. A few scattered high stumps are present, mostly at the east end of the stand. Low amounts of slash. Rolling terrain. No residual trees. Access via a locked gate.
Stand 153 - 35.6 acres. Clearcut in 2025, tops were not chipped. Rollerchop as needed. Most stumps low, moderate amounts of slash. Scattered residual of maple, white pine, and oak scattered throughout, less than 10 BA average. Rolling terrain. Access via a berm.
Stand 167- 26.2 acres. Clearcut in 2025, tops were not chipped. No rollerchopping necessary. Heavy hardwood slash accumulation in some places. Most stumps are low however there may be a few high hardwood stumps. Flat terrain. Access via an open state forest road.

Recreation: No Fisheries: No Wildlife/MNFI: No Archaeology: No
Oil/gas/electric: No active lines or wells but old infrastructure (buried lines, electric boxes) may be possible near road edges.
