

**FTP C53-549
Compartment 22, stands 46
11 treatment acres**

Objective: Planted white spruce.

Methods: Trench then plant to white spruce. The treatment area has a lot of invasive honeysuckle shrubs, most are around 2-4 feet in height. Stumps and slash are minimal. Areas of seasonally wet ground along the east edge of the treatment. A few small scattered rock piles along the west side of the treatment.

Location: Cheboygan County, T33N R01E, Section 2

Comments: Clearcut in 2017, failed to regenerate. Recommended access is the closed road on the west side of the treatment. A small berm and wet drainage are present and will have to be crossed. The closed road on the east side is very wet and often flooded, do not use. Unload on Buzzels Road, there is nowhere to turn around on the open state forest road.

Recreation: No

Fisheries: No.

Wildlife/MNFI: A great blue heron rookery is present in the adjacent red pine plantation to the west.

Archaeology: No
