CERTIFICATE OF SURVEY

SURVEYORS LEGEND

- (G.L.O.) = Subdivision Lines - James Mullett (1837)
 (WJ) = William Jacques (undated)
 (LS) = Lyle Shepherd (1920's - 1930's)
 (JP & RG) = Jack Pierson & Robert Griffin (1977)
 (RG) = Robert Griffin (1977)
 (JP) = Jack Pierson (1980)
 (GH) = Glen Hackbardt (1984)
 (NO) = Norm Ochs (2000, 2003)
 (JK) = James Keller (2004)
 (JD) = John Doornbos (2001)

LEGAL DESCRIPTION OF THE UNITED STATES GOVERNMENT LAND:

The South 1/2 of the Northeast 1/4 AND the North 1/2 of the Southeast 1/4 AND the Northwest 1/4 of the Southwest 1/4 AND the Northwest 1/4, Section 22, T14N-R11W, Twp. of Goodwell, Newaygo County, Michigan.

The shown measured distances are in NAD 83 Michigan Central Zone State Plane Grid in international feet. The conversion to ground distance is performed by the formula:

GRID DISTANCE

= GROUND DISTANCE

COMBINED GRID FACTOR

The COMBINED FACTOR used for this project was = 1.000148704, which is an average combined factor between the NE Corner of Section 22 and the SW Corner of Section 26.

Conversion from international feet to meters is 1 FOOT = 0.3048 METERS.

NOTES: We are reporting the coordinates for this project in MICHIGAN CENTRAL GRID, although our location is in MICHIGAN SOUTH GRID, therefore the difference between GRID and GROUND distances are larger than normal.

The STATE PLANE COORDINATES for this project were established using the MICHIGAN CORS NETWORK - NAD 83 (CORS 1996).

I HEREBY CERTIFY THAT I HAVE SURVEYED THE PARCEL OF LAND DESCRIBED, THAT SAID SURVEY WAS PERFORMED WITH A FIELD ERROR OF MEASURE OF _____ IN 5000 OR GREATER, AND THAT I HAVE FULLY COMPLIED WITH THE REQUIREMENTS OF ACT #132, P.A. 1970.

SUBMITTAL 3160.5 – REPORT OF SURVEY

CONFLICTS AND ENCROACHMENTS

Section 22

- There are some minor encroachments in this section along the S. 1/16th Line in the West ½ of said section. The private land owner to the South has some quad trails that he is using for access to USA Property. The private land owner has planted a wildlife food plot and also erected an elevated hunting blind that encroaches over the property line. When we went back to post this part of the project our lath had been moved +/- 200-300' North of the property line. We remarked and posted the property line and as of early December the land owner hadn't moved any carsonites along the West end of this line.
- There are some other trails within this section that cross from private to USA property that people are using for access which run over and across USA Property.
- I found an iron and cap by Lakestate Surveyors at the C-S 1/16th Corner. The found iron was 1.98 feet out of position and was not honored for this survey.

Section 26

- There aren't any structural encroachments within this section. There are some trail roads and drives which people are using for access to their property which run over and across USA Property. These trails will be shown on the control diagram and Certificate of Survey.
- I re-established the East ¼ Corner at a single proportionate position as was intended by Jack Pierson and prepared a new LCRC.
- There is a small wood pile and some N-S fence remnants along the East 1/16th line in the SE ¼ that encroach over the line. I'm not sure what happens to the fence, I tried finding more remnants of the fence further down the line but was unable to locate any. This fence might just have been for a pasture.
- John Doornbos performed a survey in the West ½ of said section and monumented the North 1/16th Line. It appears our line is +/- 4.2' North of the line as monumented by Mr. Doornbos. When comparing section information it appears we should agree much closer than the 4.2'. I've contacted Mr. Doornbos to see if he might be using some different control corners but I have not heard from him. I posted the property line to our computed position.

Section 27

- The West ¼ Corner of this section was repositioned to be 33' East of the Fd. Harrison Monument to be consistent with found N-S R/W fence occupation. The Harrison Monument has already been moved and witnessed by Newaygo Engineering and Survey, Inc. I'm showing their witnesses on the Certificate of Survey.
- There are fence remnants along the South Section Line. The fence was used to establish the South ¼ Corner and was +/- 3.5' South of line at the W. 1/16th Corner. The fence was mostly down and could be seen growing in trees and found with a magnetic locator.

Certificate of Survey

S. 1/2, SE. 1/4, SEC. 22, T14N R11W, NEWAYGO CO.

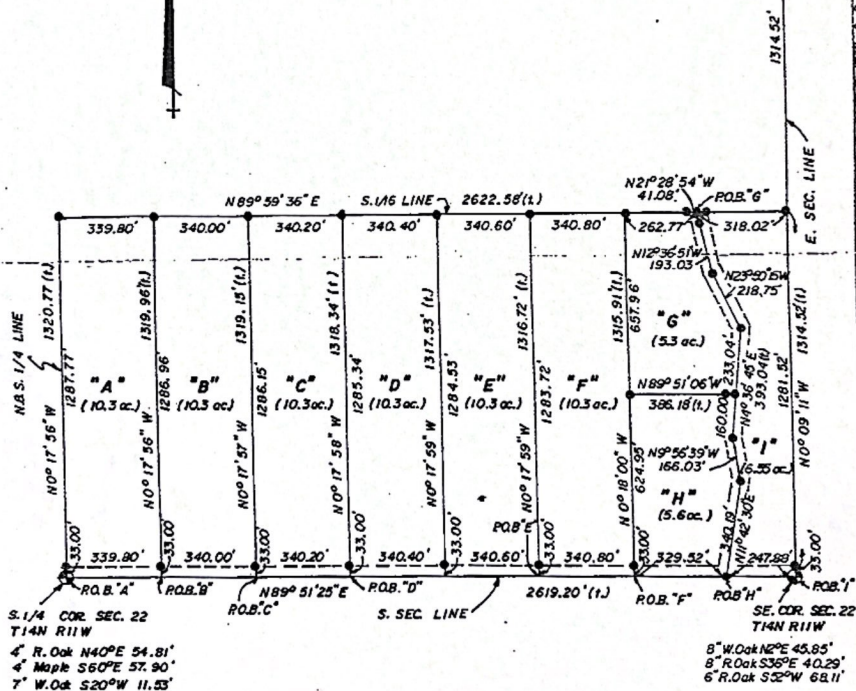

I hereby certify that I have surveyed and mapped the following described parcel(s) of land in accordance with Act 132, P.A. 1970. And that the error in the relative position of points established does not exceed one part in _____ or 0.15 ft. where the total length of traverse is not greater than 750 ft.
Bearings: U.S.F.S. Sec. Traverse

I, Christopher J. McCrimmon, in a field survey on September 15, 20 10, do hereby state that under requirements of P.A. 74, Michigan P.A. of 1970, the corner points mentioned in lines 1 and 2 above were in conformance with regulations and rules therefore as required in the current manual of survey instructions of the United States Department of the Interior, Bureau of Land Management or by a decree of a Court of Law and /or that the corner points mentioned in lines 3, 4 and 5 above were in conformance with the rules of the Michigan Board of Land Surveyors or by a Decree of a Court of Law; established, re-established, monumented, recovered, found as expressed below:

NOTE: Not more than 2 corners, all in the same town and range, may be recorded on this certificate.

A. Description of original monument and accessories and/or subsequent restoration:

Corner 5; The C-N 1/16th Corner of Section 22, T14N-R11W

- I didn't find any previous history for this corner position.

Corner 7; The N. 1/16th Corner on the East Line of Section 22, T14N-R11W

- I didn't find any previous history for this corner position.

B. Description of corner evidence found and/or method applied in restoring or reestablishing corner:

Corner 5; The C-N 1/16th Corner of Section 22, T14N-R11W

I didn't find any evidence of a corner at this position while searching with a magnetic locator. I set a 1/2" iron and cap, P.S. #:47962 flush with the ground at a proportionate position and accepted it as the position of the corner. There are some fence remains for a fence going East and North which is N66E, +/- 70' from the corner position. This fence meanders in both directions and I don't think it was intended to be a property line fence.

Corner 7; The N. 1/16th Corner on the East Line of Section 22, T14N-R11W

I didn't find any evidence of a corner at this position while searching with a magnetic locator. I set a 1/2" iron and cap, P.S. #47962 +/- 10" below the dirt road surface at a proportionate position and accepted it as the position of the corner. This corner is approximately 2' East of the physical centerline of Cottonwood Ave.

C. Description of monument for corner and accessories established to perpetuate locating the position of the corner:

Corner 5; The C-N 1/16th Corner of Section 22, T14N-R11W

Set a 1/2" iron and cap at a proportionate position.
 N17E - set 60d nail in E face of 5" Maple - 33.03'
 N83E - set 60d nail in SE face of 8" B. Oak - 45.42'
 N56W - set 60d nail in SW face of 4" Beech - 41.77'
 North - Carsonite Post - 1'

Corner 7; The N. 1/16th Corner on the East Line of Section 22, T14N-R11W

Set a 1/2" iron and cap at a proportionate position.
 S81E - set 60d nail in S face of 12" Tw. R. Oak - 47.96'
 S54W - set 60d nail in NW face of 14" R. Oak - 61.73'
 N37W - set 60d nail in SW face of 12" W. Oak - 70.99'
 West - I&C #: 47962 - 33.00'
 West - Carsonite Post - 34'
