SURVEY REQUEST

Requesting Agency Atlanta Mgmt Unit		County Presque Isle		Township 33N		Range 05E		Section(s) 28 and 29	
Location T33N R05E, Sections 28 and 29				Priority High		Survey Purpose Timber Sale Prep			
Requirements (specify lines or attach map) Will need 5 survey corners put in (see included map). The 2 corners needed within section 28 may not need to be established if private access is not obtained.		Desired Completion Date 3/30/22							

Requested By Darrick Coy		Date 08-30-21	
SURVEY PROJECT ESTABLISHMENT			
Assigned Priority		Expected Completion Date	
Assigned To		Supervisor's Signature	
COMPLETION REPORT			
Miles of Boundary Line		Date Completed	
Number of Corners Set		Number of Corners Upgraded	
Maps To		LCRC's To	

SURVEY PRIORITY JUSTIFICATION

1. Is litigation involved now or being threatened? Explain:
Yes, a residential structure is likely encroaching onto state along the east line of the MNW of section 29.

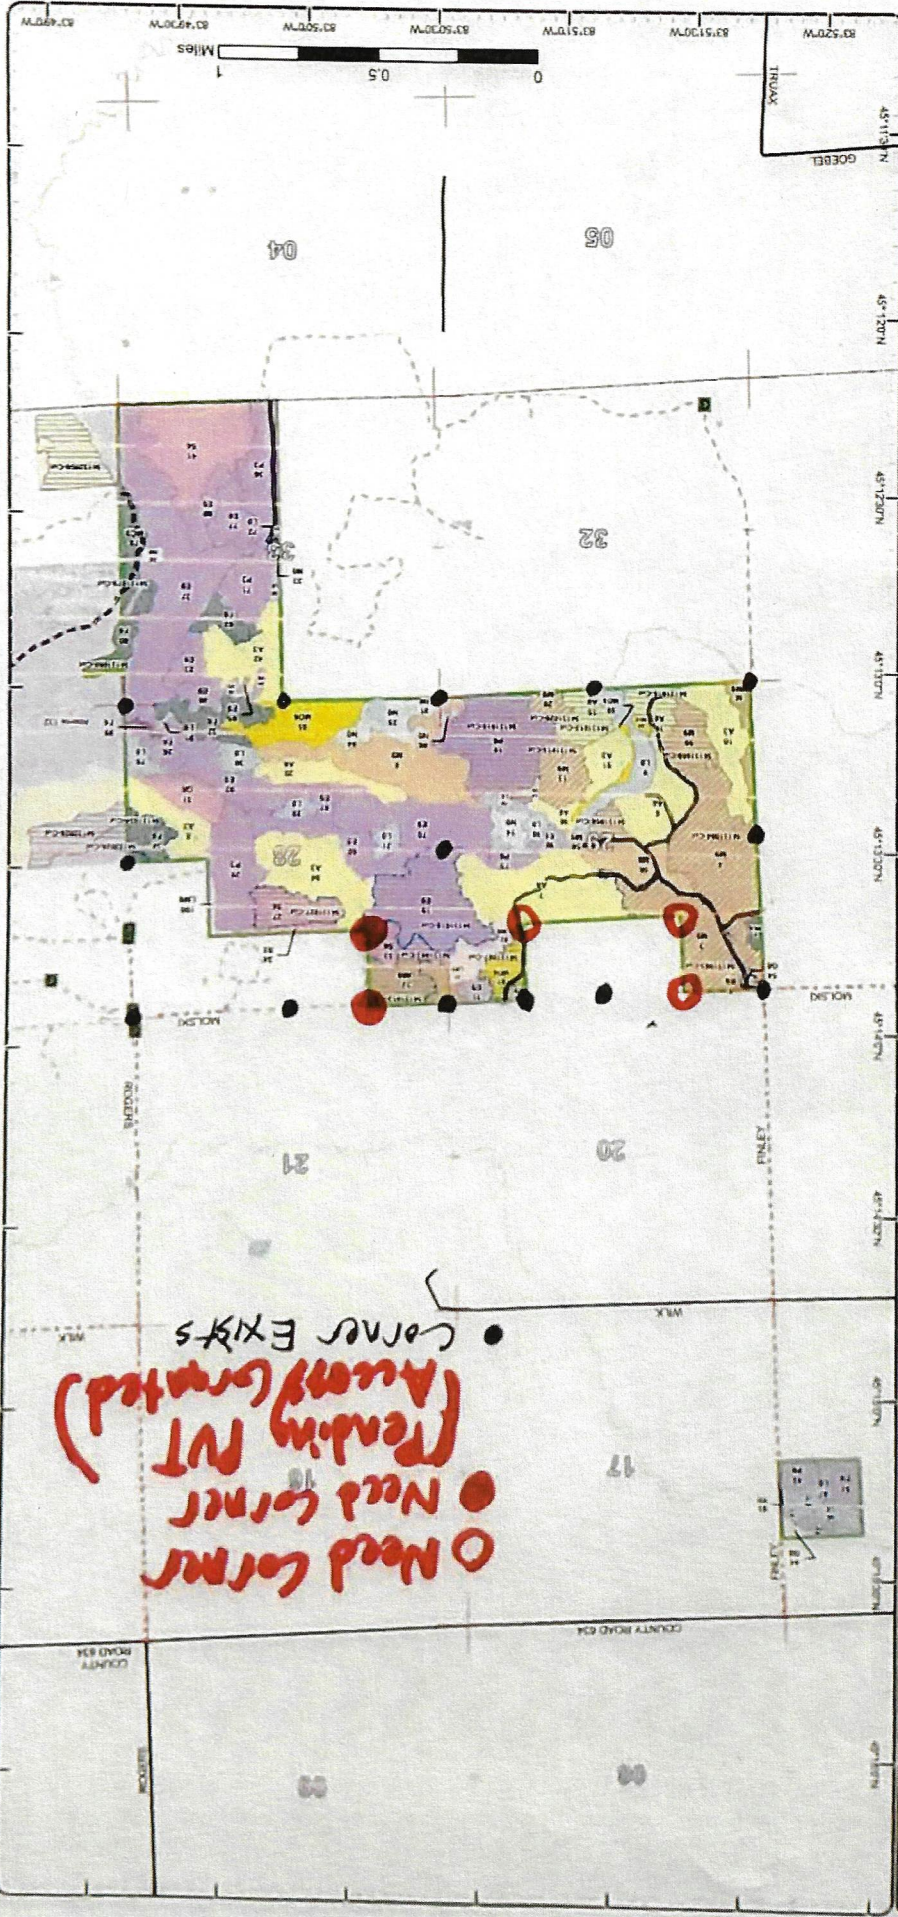

2. If trespass is on state land, is the survey likely to prevent further trespass and harm, or is it to prove trespass? Explain:
Yes. A survey will clearly show where the property divide is located.

3. Is prevention of access to a significant area of state land involved? Explain:
No.

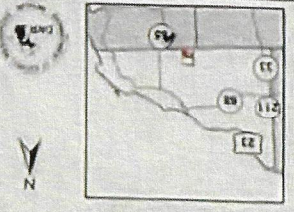

4. Will a survey allow harvest of timber that is being held from the market due to survey problems? What is the value of the proposed sale? Explain
(i.e., give the compartment, year of entry, timber condition, etc.):
Yes, 234 acres total. Total sale value ~\$280,000-\$320,000. (compartment 131, YOE 2023, 50-70 yr old aspen and northern hardwoods).

5. Are there reasonable alternatives to a survey that will allow at least a partial or temporary solution? (Example: Reduce size of the sale, agreement with or notification of adjacent landowner until proper survey can be done, establish line yourself, etc.) Explain:
Yes. Approximately 100ft offset onto state land was left along the property line so the timber sale could be set up without delay. Any additional timber needing to be cut after the survey is complete will be added to the sale and scaled using the contract prices.

6. Other:
No.

• Need corner

SURVEY PRIORITY JUSTIFICATION

1. If litigation involved now or being threatened? Explain: No

2. If trespass is on state land, is the survey likely to prevent further trespass and harm, or is it to prove trespass? Explain: New "No Trespassing" signs have been put up on what appears to be state land in section 36. It also appears a timber harvest from private land went onto state land within section 36.

3. Is prevention of access to a significant area of state land involved? Explain: No

4. Will a survey allow harvest of timber that is being held from the market due to survey problems? What is the value of the proposed sale? Explain: (i.e., give the compartment, year of entry, timber condition, etc.): Yes, treatment 54160132 19.2 acres. Pole size aspen section 36
Treatment 54160140 15.7 acres pole and log sized aspen section 25
Treatment 54160055, 54161026, 54161018 log size aspen, mixed deciduous 106 acres.

5. Are there reasonable alternatives to a survey that will allow at least a partial or temporary solution? (Example: Reduce size of the sale, agreement with or notification of adjacent landowner until proper survey can be done, establish line yourself, etc.) Explain: Would have to establish a buffer in treatments 54160132 and 54160140.
Treatments 54160055, 54161026, and 54161018 need survey done in order to use an existing stream crossing which private land is needed to cross in order to use. This would make a bridge along with thousands of dollars in road work not needed.

6. Other: It looks like new no trespassing signs have been put up in section 36
No corner is found and no witness trees due to possible removal of some trees in section 25.
