 Land all swamp thick. Mostly
 tall Tamarack some cedar and
 Alder.

My reason for running these lines
and establishing corners is because
it makes it more convenient for
me on account of moving camp
and getting back to the work after
North and South lines are run
and it does not materially change
the order of the work. The land
being so swampy and difficult
to run that I can only run and
correct 3 miles per day which fact
makes it necessary to work to
the best possible advantage
