GENERAL COMMENTS:

Good on number of marks. Cutting and clearing appears to be Good to Excellent. A good number of reference marks and a good number of line trees. Excellent job moving brush to USFS lands.

A few areas I would point out for FUTURE PROJECTS IN THIS REGION:

- Aerosol Paint is acceptable; brushed on paint isn't required
- ALL witnesses should be marked with a Chest and Stump Blaze; even those on Private Lands
- Per specifications 3136 & 3136.1 = *"Section subdivisional and other corners will be marked with a monument that meets State of Michigan requirements (½ inch (#4) by 30" length rebar with a 3 ¼ inch aluminum cap monument) and will be supplied by the Contractor and monument type will be included in all drawing legends." **AND** "All section subdivisional corners monumented under this contract using a monument provided by the contractor shall be stamped in accordance with the 2009 BLM Manual of Instructions (pages 113-116)."*
