Payment unit(s) \$18,000 in value or greater may be divided at the request of the purchaser and upon approval of the Unit Manager. Dividing payment units is a contract modification which requires a Timber Sale Contract Supplement.

### 4 - Transportation

#### 4.1 - Construction

##### 4.1.8 - Road work (1) (8/07)

The following road work is required: the contractor must purchase and install a new 15" X 24' corrugated steel culvert at the location shown on the map. The contractor must place a minimum of twelve inches of gravel over the culvert. The approaches also need some gravel as well. The contractor will need to haul a total of 60 cubic yards of gravel on the access trail running from the North State Road back into unit 6. Gravel is available from a state pit that is located about 1.5 miles away. No DEQ permit is needed for the cross drainage culvert that is being installed.

#### 4.2 - Maintenance

The reason for the recommendation is because of some low wet areas in unit 6 and to access unit 9 you will have to skid through some low ground to get between the unit and the access road, unless the contractor can access the unit through private property or they lay down about 100 feet of mats to skid across.

## Sale Specific Conditions & Requirements

Sale Name: Miscauna Creek Sale Number: 33-031-11-01

### 1 - Sale Area

#### 1.2 - Boundaries

##### 1.2.1 - Painted boundaries (12/08)

The sale boundary and Payment Unit boundaries are marked and identified by blue, red and yellow paint. Exterior sale boundary lines against private property are marked with blue paint. Exterior sale boundary lines against state are marked with red paint. Interior Payment Unit boundaries are marked with yellow paint, except the road is the unit line between units 3 and 4. Yellow painted trees designating an interior Payment Unit boundary are only to be cut when all surrounding Payment Units have been paid for.

### 2 - Timber Specifications

#### 2.1 - Included Timber

##### 2.1.1 - Clearcut unit(s) with unmerchantable trees (4/09)

Within Payment Unit(s) 1, 2, 3 and 4, cut all species of trees that are three (3) inches or more in diameter measured at a point four and one-half (4-1/2) feet above ground level regardless of merchantability except trees marked with green paint. Also, in units 3 and 4, do not cut elm or cedar greater than 10" inches measured at DBH.

##### 2.1.11 - Description of timber note (2/04)

Note that the mixed softwood volume contains about 117 cords of spruce, 60 cords of balsam fir, 40 cords of white pine, and 4 cords of red pine. There is also a small amount of tamarack.

### 3 - Payments

#### 3.3 - Pre-measured Sales

##### 3.3.4 - Dividing payment units (12/08)

Payment unit(s) with a value greater than \$18,000 may be divided at the request of the purchaser and upon approval of the Unit Manager. Dividing payment units is a contract modification which requires a Timber Sale Contract Supplement.

### 4 - Transportation

#### 4.2 - Maintenance

##### 4.2.1 - Hauling restriction (12/08)

Hauling may be restricted on forest roads by the Unit Manager or his/her representative. The restriction may occur during spring breakup or during other wet weather conditions.

#### 4.4 - Access

##### 4.4.1 - Private property access (3/11)

Permission for access across private land has been obtained by the DNR. The landowner to the east of the sale has given permission for contractors to use the Miscauna Grade through his property. The best access into the sale is coming from the east. The best route is to come down from G-18 on the Miscauna Creek road until it crosses the Miscauna Grade and then head west until you reach the sale area. The approach to the grade within the sale area angles to the east. More work would be needed if trucks are to head west towards the State Road. If an alternate route is used, permission for DNR personnel to access the sale must be included.

##### 4.4.2 - Alternate route on private property (2/04)

It is the purchaser's responsibility to obtain access across private land for any routes other than the route shown on the sale map.

### 5 - Operations

#### 5.2 - Conduct of Operations

##### 5.2.1 - Slash

##### 5.2.1.1 - Slash within sale area (2/04)

No trees are to be felled outside the sale area and all slash is to be kept at least 10 feet back from the blue paint line.

### 5.2.3 - Operating Restrictions

#### 5.2.3.1 - Operating restrictions (12/08)

Within Payment Unit(s) 3 and 4, unless changed by written agreement, cutting and skidding are limited to the period of December 1st to March 31st when the ground is frozen, unless there is a dry period of time and the sale administrator allows cutting during that period of time. This restriction is because of low wet ground within these units.

#### 5.2.3.4 - Oak wilt restriction (6/10)

Within Payment Unit(s) 1 and 2 unless changed by written agreement, cutting and skidding are not permitted during the period of April 15 to July 15. This is necessary to reduce the spread of oak wilt. For more information, contact the Unit Manager or his/her representative.

#### 5.2.32 - Decking/landing restoration (9/10)

All decking and landing areas must have the surface area restored to a condition equal to or better than before. This is to insure the proper regeneration of the stand.

### 5.4 - Soil Protection

#### 5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

## 6 - Safety and Fire Prevention

### 6.2 - Signing

#### 6.2.1 - Road posting (9/09)

The purchaser is responsible for posting and maintaining caution signs on 30.5 Lane and the Miscauna Grade prior to beginning operations. ##### 4.1.2 - Stream crossings, specific (3/11)

There is an intermittent stream/drain between Payments Units 1 and 2 as shown on the Timber Sale Map. No new roads will be built into unit 1, all of the wood must be skid across the drain and into unit 2. The temporary crossing can be a portable bridge or wooden mats. The sale administrator must approve the type of crossing prior to the contractor installing it. This drain will only be crossed in one location. No DEQ permit is needed.

The landowner has agreed to let contractors through his property to harvest units 8 and 9, but he wants to be notified when a contractor wants to access

these units. If a contractor wants to look at these units prior to bidding they must let the landowner know if they are going to use his access road. The landowner will not allow access during deer season. There are two gates where the access trail branches off from the State Road, the state has been granted access from the landowner with the southern yellow gate.

#### 5.2.3 - Operating Restrictions

###### 5.2.3.3 - Bark slippage restriction (3/09)

Within Payment Unit(s) 3, unless changed by written agreement, cutting and skidding are not permitted during the period of April 15 to July 15. This restriction is because of bark slippage.

##### 5.2.22 - Operating Caution

###### 5.2.22.1 - Operating caution (6/11)

It is recommended, but not required, that within Payment Unit(s) 4, cutting and skidding occur during dry summer or frozen winter conditions. The reason for the recommendation is because of a low, wet drain running through the unit. This should be crossed in the winter when the ground is frozen or during a dry period of time, and the contractor uses mats to skid the wood across.

#### 5.4 - Soil Protection
