4.1 - Construction

4.1.8 - Road work (1) (8/07)

The following road work is required: the contractor must purchase and install a new 12 inch by 24 foot corrugated steel culvert. The location is shown on the timber sale map. The contractor must also haul and spread 200 yards of gravel on the Jones Trail going into unit 15. There are some low areas that will require fill starting from County Road 577 and going back into unit 15. Twelve inches of gravel must also be placed over the new culvert. Gravel is available from a state pit located about five miles away. The roadwork must be completed prior to harvesting in unit 15. Jones Trail will need to be leveled to cut unit 7 this winter, but the required roadwork will not need to be done, due to the short time frame for cutting unit 7.

4.2 - Maintenance

4.2.1 - Hauling restriction (12/08)

Hauling may be restricted on forest roads by the Unit Manager or his/her representative. The restriction may occur during spring breakup or during other wet weather conditions.

4.2.4 - Grading (12/08)

Roads must be graded after the sale is completed. In general, this will require a road grader or bull dozer to shape up the roads after forest products have been hauled off site. The grading equipment to be used must be approved by the Unit Manager or his/her representative.

4.4 - Access

4.4.1 - Private property access (3/11)

Permission for access across private land into units 13 and 14 has been obtained by the DNR. The contractor is responsible for contacting the landowner prior to looking at the sale and prior to the winning contractor harvesting these units.

5 - Operations

5.2 - Conduct of Operations

5.2.1 - Slash

5.2.1.1 - Slash within sale area (2/04)

No trees are to be felled outside the sale area and all slash is to be kept at least 10 feet back from the blue paint line.

5.2.1.2 - Slash Removal

5.2.1.2.1 - Slash removal, right-of-way (12/04)

All slash must be removed at least 10 feet from the cleared right-of-way of forest roads.

5.2.3.2 - Operating restrictions (9/11)

Within Payment Unit(s) 6 and 7, unless changed by written agreement, cutting, skidding and hauling of all oak must be completed by April 1, 2013. This restriction is to minimize/reduce the spread of oak wilt.

5.2.3.3 - Bark slippage restriction (3/09)

Within Payment Unit(s) 3, 5, 9, 10, 12 and 14, unless changed by written agreement, cutting and skidding are not permitted during the period of April 15 to July 15. This restriction is because of bark slippage.

5.2.3.4 - Oak wilt restriction (6/10)

Within Payment Unit(s) 8 unless changed by written agreement, cutting and skidding are not permitted during the period of April 15 to July 15. This is necessary to reduce the spread of oak wilt. For more information, contact the Unit Manager or his/her representative.

5.2.3.11 - Coppice regeneration protection (4/10)

To promote aspen regeneration, harvesting is limited to October 1st through April 15th in unit 1.

5.4 - Soil Protection

5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

7 - Other Conditions

7.2 - Extensions

7.2.4 - Oak wilt extension (1/11)

This sale contains trees infected with oak wilt that must be harvested promptly. One (1), twelve (12) month extension can be applied to one (1) other State Forest Timber Sale Contract owned by the purchaser and expiring within twelve (12) months from the date of this contract, to permit expediting the harvest of this sale. The free extension must be used before this contract is closed-out. This specification does not alleviate the purchaser from any contractual obligations of the extended State Forest Timber Sale Contract. Per General Condition & Requirement 7.2, extensions are at the sole discretion of the DNR.

7.3 - Contract Modifications

7.3.2 - Modification for oak wilt (2/05)

Within the sale area, there may be patches of oak wilt. If oak wilt is identified within the sale area, this contract may be modified. The following modifications could occur: time of cutting, species to cut, volume to harvest, or various others dealing with the treatment of oak wilt. If a species is not specified in this contract, it shall be paid for at the average price received for that species and product.
