#### 3.6 - Payment Unit Cutting Schedule

##### 3.6.1 - Order of cutting (1/09)

Payment Units shall be cut in numerical order from the period of December 17 until April 7, unless conditions warrant an earlier starting or ending date. An average of 1 payment unit (1/2 acre) per 7 day period will be cut. Actual amount may fluctuate depending on deer density, winter severity, and only with the approval of the Unit Manager. Cutting should be continuous and generally no more than 3 days should occur between harvesting which will provide the needed browse and avoid it being buried in snow.

##### 3.6.3 - Operating schedule (12/08)

Unless changed by written agreement, only 1 Payment Unit(s) may be operated at any one time. All contractual requirements on a Payment Unit shall be completed and accepted by the Unit Manager or his/her representative prior to the opening of an additional Payment Unit.

### 4 - Transportation

#### 4.1 - Construction

##### 4.1.12 - No new roads (1/12)

#### 4.2 - Maintenance

##### 4.2.3 - Road maintenance (9/08)

Depending on spring break up conditions, it may also need to be leveled off after harvesting operations are complete. In addition, the DNR will push the snowbanks back up to 4 times if warranted and requested by the purchaser. The purchaser

must give the Unit Manager 5 days notice to complete the request.

## **5 - Operations**

### 5.1 - Notification

#### 5.1.1 - Pre-sale conference (10/11)

A pre-sale conference on site between the Purchaser and sale administrator is required prior to beginning any operations to determine landing and road locations. The Unit Manager or his/her representative must be contacted at least 10 days in advance to schedule the conference.

#### 5.1.4 - Post-sale conference (6/11)

A post-sale conference on site between the Purchaser and sale administrator is required 5 days prior to the completion of active logging operations to determine clean-up and repair of landings, road edges, and the fulfillment of other contract specifications.

### 5.2 - Conduct of Operations

#### 5.2.1 - Slash

##### 5.2.1.11 - Slash for reforestation (5/07)

To facilitate reforestation, the sale area shall be left with slash evenly distributed. Bunched tops within the cutting area shall be broken up and scattered. Stumps shall be cut low to the ground. Processing sites shall not be left with a compacted layer of slash; tops from these sites shall be hauled back into the cut area and scattered.

##### 5.2.1.12 - Slash for prescribed burning (1/05)

To facilitate prescribed burning, slash shall be moved at least 25 feet inside the sale boundary.

##### 5.2.2.1 - Den trees (2/04)

Obvious hollow and/or den trees shall be protected and left standing unless they are a safety hazard.

#### 5.2.41 - Snowmobile trail protection (9/11)

A portion of the access road to the sale is a snowmobile trail and is shown on the Timber Sale Map. Do not cut or damage posts with orange trail markers or traffic control signs. If the trail is used, it must be maintained and restored to a condition equal to or better than before the sale. If the trail road is to be used for hauling during the snowmobile season, then a snow covered base must be left on the trail. Maintain a 20 foot wide slash, debris, and rut free zone daily using the snowmobile trail as the centerline. No decking of forest products will be permitted along the snowmobile trail.

### 5.4 - Soil Protection

#### 5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

### 5.8 - Protection of Endangered Species

#### 5.8.5 - Protection of raptor nests (4/09)

All trees with raptor nests will be protected if found during harvesting operations. Notification will be made to the Unit Manager or his/her representative who will notify the Wildlife Biologist so an on-site evaluation and recommendation can be made, if necessary.
