Payment Unit(s) that have a contract value of at least \$15,000 may be divided at the request of the Purchaser and upon approval of the Unit Manager. Dividing Payment Units is a contract modification which requires a Timber Sale Contract Supplement.

### 4 - Transportation

#### 4.1 - Construction

##### 4.1.6 - Road construction (1/09)

Construction of new roads or improvements of existing roads shall be done in such a way as to minimize the environmental and visual impacts. Merchantable trees shall be cut and utilized unless otherwise directed. Non-merchantable trees shall be severed and laid flat on the ground. Slash shall be scattered, and not left in windrows and kept a minimum of 10 feet back from the road edge. Stumps shall be set upright, not left on edge, and be moved at least 10 feet away from the road edge. Disturbed soil shall be feathered into the woods and not left in berms or windrows.

##### 4.1.7 - Road closure (10/11)

All new roads built into the sale must be blocked to vehicle traffic upon completion of the sale. Overgrown roads that are reopened shall be considered new roads. In general, this will require constructing a four (4') foot high berm of stumps and logs covered with earth. Contact the sale administrator for specific details of design and placement.

#### 4.2 - Maintenance

##### 4.2.2 - Fill material (4/07)

To maintain roads, fill material may be needed in areas where "holes" exist or may be expected to develop. This fill material should be placed before trucking begins. Contact the sale administrator regarding the availability of onsite sand or gravel from adjacent State-owned lands.

##### 2.1.7 - Leave tree marked unit(s) (8/11)

Within Payment Unit(s) 1, 2, 4, 5, 6, and 10, cut all trees that are four (4) inches or more in diameter measured at a point four and one-half (4-1/2) feet above ground level regardless of merchantability; except hemlock, beech, and trees marked with green paint above and below stump height. In addition, within units 4, 5, and 6 there are four retention areas that are bounded by a red paint line. No harvesting activities are permitted within these areas.

##### 2.1.11 - Description of timber note (2/04)

Note that there is 43 cords of jack pine within the 415 cords of white pine pulpwood.

#### 2.2 - Utilization

##### 2.2.4 - Skidding length (2/11)

Skidding of unlimbed tops or lengths over 17 feet is not permissible within units 3, 7, 8, and 9; unless approved by the Unit Manager or his/her representative.

### 3 - Payments

#### 3.3 - Pre-measured Sales

##### 3.3.4 - Dividing payment units (12/08)

Payment Unit(s) with a value greater than \$18,000 may be divided at the request of the Purchaser and upon approval of the Unit Manager. Dividing Payment Units is a contract modification which requires a Timber Sale Contract Supplement.

### 4 - Transportation

#### 4.1 - Construction

##### 4.1.8 - Road work (1) (8/07)

The following road work is required: the contractor must purchase and install two new corrugated steel culverts. One culvert must be 12" X 24' and the other will be a minimum of 18" X 24'. The contractor must cover each culvert with a minimum of 12 inches of gravel. The DNR will obtain a DEQ permit for the location of the larger culvert. The contractor must install the correct size of culvert and use appropriate fill and materials based on the DEQ permit. The other culvert location does not require a DEQ permit. All required road work must be completed prior to harvesting any of the units that are accessed over the culverts.

#### 4.2 - Maintenance

##### 4.2.1 - Hauling restriction (12/08)

Hauling may be restricted on forest roads by the Unit Manager or his/her representative. The restriction may occur during spring breakup or during other wet weather conditions.

##### 4.2.4 - Grading (12/08)

Roads must be graded after the sale is completed. In general, this will require a road grader or bull dozer to shape up the roads after forest products have been hauled off site. The grading equipment to be used must be approved by the Unit Manager or his/her representative.

## **5 - Operations**

### **5.2 - Conduct of Operations**

#### **5.2.1 - Slash**

##### **5.2.1.1 - Slash within sale area (2/04)**

No trees are to be felled outside the sale area and all slash is to be kept at least 10 feet back from the blue paint line. All slash must be kept back at least 10 feet from the edge of the roads.

#### **5.2.3 - Operating Restrictions**

##### **5.2.3.1 - Operating restrictions (9/11)**

Within Payment Unit(s) 7 cutting and skidding are not permitted during the period of February 1st to August 1st, unless changed by written agreement. This restriction is because of bark restrictions and a nearby eagle's nest.

##### **5.2.3.3 - Bark slippage restriction (3/09)**

Within Payment Unit(s) 3, 8, and 9, cutting and skidding are not permitted during the period of April 15 to July 15. This restriction is because of bark slippage.

##### **5.2.3.4 - Oak wilt restriction (6/10)**

Within Payment Unit(s) 2, 4, 5, and 6; unless changed by written agreement, cutting and skidding are not permitted during the period of April 15 to July 15. All oak harvested from these units must be hauled off site by April 15th each year. This is necessary to reduce the spread of oak wilt. For more information, contact the Unit Manager or his/her representative.

#### **5.2.22 - Operating Caution**

##### **5.2.22.1 - Operating caution (6/11)**

It is recommended, but not required, that within Payment Unit(s) 1, cutting and skidding occur during dry summer or frozen winter conditions. The reason for the recommendation is because of some low wet ground within this unit.

### **5.4 - Soil Protection**

#### **5.4.1 - Rutting restriction, general (1/09)**

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

## **6 - Safety and Fire Prevention**

### **6.2 - Signing**

#### **6.2.1 - Road posting (9/09)**

The Purchaser is responsible for posting and maintaining caution signs on the Bear Point Road prior to beginning operations. The road must be posted at appropriate distances from the sale area to warn of logging activity and truck traffic. Signs must be removed when harvest operations are suspended or completed. The Purchaser will provide these signs.

## **7 - Other Conditions**

### **7.3 - Contract Modifications**

#### **7.3.2 - Modification for oak wilt (2/05)**

Within the sale area, there may be patches of oak wilt. If oak wilt is identified within the sale area, this contract may be modified. The following modifications could occur: time of cutting, species to cut, volume to harvest, or various others dealing with the treatment of oak wilt. If a species is not specified in this contract, it shall be paid for at the average price received for that species and product.
