### 4 - Transportation

#### 4.1 - Construction

##### 4.1.8 - Road work (1) (8/07)

The following road work is required: the purchaser must purchase and install two new 12 inch by 24 foot corrugated steel culverts. The culvert locations are shown on the timber sale map. The culverts must have a minimum of twelve inches of gravel placed over them. These culverts are needed to improve cross drainage, so no permits are necessary. The purchaser is also required to haul and spread 220 cubic yards of pit run gravel on the access roads. The gravel will be placed over the culverts and on different portions of the Small Creek Road. The exact locations will be determined during the pre-sale

#### 4.2 - Maintenance

##### 4.2.1 - Hauling restriction (12/08)

Hauling may be restricted on forest roads by the Unit Manager or his/her representative. The restriction may occur during spring breakup or during other wet weather conditions.

##### 4.2.4 - Grading (10/13)

For completion of the sale, state forest roads must be graded. In general, this will require a road grader or bull dozer to shape up the roads after forest products have been hauled off site. The grading equipment to be used must be approved by the Unit Manager or his/her representative.

#### 4.4 - Access

##### 4.4.4 - Restricted access (10/05)

The Small Creek Road will be the only access road that contractors may use to access the southern and eastern portions of the sale. All other access points/roads through the surrounding private property will be bermed in the near future and will not be available for contractor use.

All of the roads near Muskrat Lake are available for access to the northern portions of the sale. The gate is locked on the west end of the Small Creek Road, if a contractor is interested in accessing the southern portion of the sale with a vehicle to do a pre-bid inspection they may contact Dustin @ 906-753-6317 ext 224 to obtain a key and written permission.

### 5 - Operations

#### 5.2 - Conduct of Operations

##### 5.2.1 - Slash

###### 5.2.1.1 - Slash within sale area (2/04)

No trees are to be felled outside the sale area and all slash is to be kept at least 10 feet back from the blue paint line.

###### 5.2.1.2 - Slash Removal

###### 5.2.1.2.1 - Slash removal, right-of-way (12/04)

All slash must be removed at least 50 feet from the cleared right-of-way of the Sturgeon Landing Road.

##### 5.2.3 - Operating Restrictions

###### 5.2.3.1 - Operating restrictions (9/11)

Within Payment Unit(s) 2 cutting and skidding must be completed by April 15, 2015. This restriction is because of known oak wilt pockets within the unit. In addition all oak must be hauled off site to an approved processing facility or where there is no oak within one mile by April 15, 2015 to reduce the spread of oak wilt disease.

###### 5.2.3.2 - Operating restrictions (9/11)

Within Payment Unit(s) 4, 5, 8, 9, 10, 11, 12, and 13 cutting and skidding are limited to the period of December 1st to March 31st, unless there is a dry period of time and the sale administrator allows cutting during a different time period. This restriction is because of low wet ground throughout all of these units.

###### 5.2.3.4 - Oak wilt restriction (6/10)

Within Payment Unit(s) 1, 2, 7, and 15 cutting and skidding are not permitted during the period of April 15 to July 15. All oak harvested within units 1, 2, and 7 must be hauled off site by April 15th each year. This is necessary to reduce the spread of oak wilt. For more information, contact the Unit Manager or his/her representative.

##### 5.2.2 - Operating Caution

###### 5.2.2.1 - Operating caution (6/11)

It is recommended, but not required, that within Payment Unit(s) 14, cutting and skidding occur during dry summer or frozen winter conditions. The reason for the recommendation is because of low wet ground in parts of the stand.

#### 5.4 - Soil Protection

##### 5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may

return to the area when the risk of rutting has decreased.

## **6 - Safety and Fire Prevention**

### 6.2 - Signing

#### 6.2.1 - Road posting (9/09)

The Purchaser is responsible for posting and maintaining caution signs on the Sturgeon Landing Road prior to beginning operations. The road must be posted at appropriate distances from the sale area to warn of logging activity and truck traffic. Signs must be removed when harvest operations are suspended or completed. The Purchaser will provide these signs. The signs are only needed on the Sturgeon Landing Road when operations are occurring in units 1 - 3.

## **7 - Other Conditions**

### 7.3 - Contract Modifications

#### 7.3.2 - Modification for oak wilt (2/05)

Within the sale area, there may be patches of oak wilt. If oak wilt is identified within the sale area, this contract may be modified. The following modifications could occur: time of cutting, species to cut, volume to harvest, or various others dealing with the treatment of oak wilt. If a species is not specified in this contract, it shall be paid for at the average price received for that species and product.

### 7.5 - Loss

#### 7.5.1 - Deteriorating timber (7/09)

The sale area has received damage from oak wilt and the eastern larch beetle. Unit 2 has a number of oak wilt epi-centers within it and there are other suspected epi-centers throughout the other units. There are also some pockets of tamarack mortality in the swamp units, due to the eastern larch beetle. The Purchaser should harvest the wood as soon as possible. The Department of Natural Resources is held free of responsibility of any further damage or deterioration due to delay in harvesting.
