2.2.10 - No chipping tops and limbs (4/12)

Within Payment Unit(s) chipping of the bole, 4-inches in diameter or greater, is allowed. Chipping of limbs or portions of the tree less than 4-inches in diameter is not permitted. Limbs and the remaining top must be left on site and scattered.

3 - Payments

3.4 - Damaged Timber

3.4.2 - Special Protection Trees (4/14)

The Purchaser shall not cut live or dead special protection trees within cutting units or clearings. Special protection trees are white pine, red pine not marked with orange paint, oak, cedar, beech and apple. If the Purchaser's operations have cut or damaged special protection trees through carelessness, the Purchaser shall pay \$100 as fixed, agreed and liquidated damages for each special protection tree cut or damaged. Such payment does not constitute ownership of the undesignated timber.

4 - Transportation

4.1 - Construction

4.1.3 - Slash and earthen piles (8/04)

Piles or windrows of earth along roads and landings that have been widened or constructed shall be leveled. Slash from road maintenance or construction, including stumps, shall be dispersed throughout the sale, or chipped, utilized or otherwise removed from the sale. All materials placed in low, wet areas must be removed and dispersed within the sale boundaries or in areas designated by the sale administrator when operations are complete. Any gates and/or vehicle barriers removed during the conduct of logging operations shall be replaced according to the sale administrators' specifications. Any damage (rutting etc.) to the parking area off Hurds Corner Rd. shall be repaired to the sale administrators' specifications. This may include adding gravel and grading the parking area.

5 - Operations

5.1 - Notification

5.1.1 - Pre-sale conference (10/11)

A pre-sale conference between the Purchaser and sale administrator is required prior to beginning any operations to determine landing and road locations. The Unit Manager or his/her representative must be contacted at least 10 days in advance to schedule the conference.

5.1.4 - Post-sale conference (6/11)

A post-sale conference on site between the Purchaser and sale administrator is required 5 days prior to the completion of active logging operations to determine clean-up and repair of landings, road edges, and the fulfillment of other contract specifications.

5.2 - Conduct of Operations

5.2.1 - Slash

5.2.1.8 - Slash height (12/08)

No slash may exceed 48 inches in height.

5.2.1.11 - Slash for reforestation (5/07)

To facilitate reforestation, the sale, log processing and decking areas shall be left with slash evenly distributed. Bunched tops within the cutting area shall be broken up and scattered. Stumps shall be cut low to the ground. Processing sites shall not be left with a compacted layer of slash; tops from these sites shall be hauled back into the cut area and scattered.

5.2.2 - Hazard Trees/Snags

5.2.2.1 - Den trees (2/04)

Obvious hollow and/or den trees shall be protected and left standing unless they are a safety hazard.

5.2.3 - Operating Restrictions

5.2.3.1 - Operating restrictions (9/11)

Within Payment Unit(s) operations must minimize the number of skid trails; multiple skid trails will not be permitted. No cutting, hauling and/or skidding between April 1 and June 15. This restriction is necessary to minimize soil compaction and protect regeneration.

5.2.3.5 - Hunting operating restriction (12/08)

No Payment unit may be started during the period of November 10-15 without permission of the Unit Manager or his/her representative. In most cases permission to harvest during this time will be granted. However, signage will be required notifying area users of harvest well in advance of the start of harvesting operations. See sale administrator for instructions.

5.2.3.11 - Coppice regeneration protection (4/10)

Timber harvesting in any Payment Unit must be completed before significant aspen sprouting occurs in that Payment Unit so as to minimize damage to the new regeneration.

5.2.32 - Decking/landing restoration (9/13)

All decking and landing areas must have the surface area restored to a condition equal to or better than before. This is to ensure the proper regeneration of the stand. At the sale administrators discretion, this may include grading, leveling and seeding of all landing and loading areas. All windrows of material on the edges of landing and processing areas must be dispersed within the sale boundaries.

5.4 - Soil Protection

5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 8 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

6 - Safety and Fire Prevention

6.2 - Signing

6.2.1 - Road posting (9/09)

The Purchaser is responsible for posting and maintaining caution signs on Hurds Corner Rd. prior to beginning operations. The road must be posted 200 feet from the sale area in either direction to warn of logging activity and truck traffic. Signs must be removed when harvest operations are suspended or completed. The Purchaser will provide signage.
