The road access into this sale is a snowmobile trail and is shown on the Timber Sale Map. Do not cut or damage posts with orange trail markers or traffic control signs. The road must be maintained and restored to a condition equal to or better than before the sale. If the trail road is to be used for hauling during the snowmobile season (December 1 to March 31), then a minimum 4" deep snow covered base must be left on the trail. No snow berms may be left on the trail. Hauling will be limited to Monday through Friday daylight hours only. No hauling or moving equipment on the trail after dark or on weekends or holidays. Maintain a 20 foot wide slash, debris, and rut free zone daily using the snowmobile trail as the centerline. No decking of forest products will be permitted along the snowmobile trail during the active snowmobile season (Dec. 1- March 31).

5.4 - Soil Protection

5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads which is 12 inches or greater in depth and 50 feet in length. In addition, operations are to cease immediately if equipment and weather conditions result in rutting on skid trails which is 8 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

5.4.5 - Soil caution (11/04)

Care must be taken when cutting and skidding in certain areas within the sale due to wet ground conditions. If wet areas exist during sale operation crane mats will be encouraged to minimize the soil disturbance in these areas. Contact the sale administrator for specifics.

5.8 - Protection of Endangered Species

5.8.5 - Protection of raptor nests (3/13)

All trees with raptor nests will be protected if found during harvesting operations. Notification will be made to the Unit Manager or his/her representative who will notify the Wildlife Biologist so an on-site evaluation and recommendation can be made, if necessary.

6 - Safety and Fire Prevention

6.2 - Signing

6.2.1 - Road posting (9/09)

The Purchaser is responsible for posting and maintaining caution signs on the main haul road prior to beginning operations. The road must be posted on both ends of the sale area to warn of logging activity and truck traffic. Signs must be removed when harvest operations are suspended or completed. The Purchaser will provide these signs.
