Contact the sale administrator for specific details of design and placement.

4.1.12 - No new roads (1/12)

No new roads will be permitted in any Payment Unit. All operations are limited to existing roads. Skid trails only will be allowed.

5 - Operations

5.2 - Conduct of Operations

5.2.1 - Slash

5.2.1.11 - Slash for reforestation (3/21)

To facilitate reforestation, the Sale Area shall be left with slash and tops piled upon the stump of each respective tree from which it is cut to limit damage done to existing, adjacent pine regeneration.

5.2.2 - Hazard Trees/Snags

5.2.2.1 - Den trees (10/16)

Obvious hollow and/or den trees shall be protected and left standing unless they are a safety hazard.

5.2.3 - Operating Restrictions

5.2.3.1 - Operating restrictions (9/11)

Within Payment Unit(s) 1, a primary skidding area will be designated by the Sale Administrator. This area will be utilized for travel between entering the Sale Area and secondary skidding throughout the unit. Secondary skidding is defined as any other skidding necessary for the forwarder to load cut roundwood. Upon the forwarder attaining a full load of cut roundwood, the shortest distance will be taken to return to the primary skidding area to exit the Sale Area. This restriction is in place to reduce the negative impact on the existing red pine regeneration within the Sale Area.

5.2.3.2 - Operating restrictions (9/11)

Within Payment Unit(s) 1, cutting, skidding, and hauling are not permitted unless there is an average minimum snow depth of 12" on the ground within the Sale Area. This restriction is in place to protect existing natural red pine regeneration on site from the initial seed tree harvest.

5.2.18 - Equipment requirements (1/09)

Trees must be harvested with an in-woods processor (feller bunching harvesting will not be allowed) in order to retain the existing understory. This is to protect the red and white pine regeneration that is present within the sale area. Other types of equipment may be used if the Purchaser can demonstrate that damage would be minimized, along with approval from the Unit Manager.

5.2.19 - Grapple skidders (12/08)

No grapple skidders are to be used in any Payment Unit without permission of the Unit Manager or his/her representative.

5.2.38 - No decking against live trees (2/04)

Cut products may not be decked against unmarked or designated leave trees.

5.2.40 - Pathway protection (10/10)

The Shingle Mill Pathway is a biking, hiking, and skiing trail and is shown on the Timber Sale Map. Do not cut trees or damage posts with blue pathway markers. Maintain a 20-foot wide slash, debris, and rut free zone daily, using the pathway as the centerline. Do not run equipment down the pathway. Skidding across the trail may only occur in locations approved by the Sale Administrator.

5.4 - Soil Protection

5.4.1 - Rutting restriction, general (7/16)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and/or skid trails which is 12 inches or greater in depth and 25 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

5.8 - Protection of Endangered Species

5.8.5 - Protection of raptor nests (3/13)

All trees with raptor nests will be protected if found during harvesting operations. Notification will be made to the Unit Manager or his/her representative who will notify the Wildlife Biologist so an on-site evaluation and recommendation can be made, if necessary.

6 - Safety and Fire Prevention

6.2 - Signing

6.2.3 - Recreational trail posting (10/20)

The Purchaser is responsible for posting and maintaining caution signs on the Shingle Mill Pathway prior to beginning operations. The trail must be posted at locations agreed upon by the sale administrator to warn of logging activity and truck traffic at both ends of the trail. Signs must be removed when harvest operations are suspended or completed.
