

Compartment Review Presentation

Gaylord Forest Management Unit

Compartment 52165

Entry Year 2026

Acreage: 2,027

County Cheboygan

Management Area: Huron Sandy Lake Plain

Stand Examiner: John Scheele

Legal Description:

38N - 2W Sections 7 - 9 and 16 - 18

Identified Planning Goals:

To provide for the protection, integrated management and responsible use of a healthy, productive, and undiminished forest resource base for the social, recreational, environmental, and economic benefit of the State of Michigan.

Soil and topography:

Soils for the compartment consist of the Detour-Brevort Association. Topography is nearly level.

Ownership Patterns, Development, and Land Use in and Around the Compartment:

Compartment is mostly contiguous with a few isolated private parcels within the compartment. Larger-sized, rural private forested properties surround most of the compartment.

Unique Natural Features:

Potential for Blanding's turtle, massasauga, great blue heron rookery, eagle, merlin, and osprey. Potential for marsh birds: black tern and American bittern. Potential for ram's head orchid and dwarf lake iris in conifer swamps.

Archeological, Historical, and Cultural Features:

No Archeological, Historical, or Cultural Features known.

Special Management Designations or Considerations:

None.

Watershed and Fisheries Considerations:

This section contains a small unnamed tributary to Lake Huron. Best management practices should be followed to minimize erosion into the stream.

Wildlife Habitat Considerations:

Treatments in this compartment will maintain age class diversity in both upland and lowland aspen while creating early successional habitat benefiting deer, grouse, and woodcock.

Mineral Resource and Development Concerns and/or Restrictions

The closest known active sand/gravel pit is three miles southwest. The compartment appears to be dominated by low wetlands, and potential for development of any potential sand & gravel resources within the compartment is considered low. There is no known potential for economic production of other minerals from within the compartment, and there has been no recent mineral leasing activity involving State-owned mineral rights in the area.

Vehicle Access:

Access is fairly limited. Old Mackinaw Road runs through the center of the compartment and provides some limited access.

Survey Needs:

None needed.

Recreational Facilities and Opportunities:

No recreational facilities. Compartment is used primary for hunting opportunities.

Fire Protection:

No concerns. Compartment is mostly very wet.

Additional Compartment Information:

The following reports from the Inventory are attached:

- Total Acres by Cover Type and Age Class**
- Cover Type by Harvest Method**
- Proposed Treatments – No Limiting Factors**
- Proposed Treatments – With Limiting Factors**
- Stand Details (Forested and Nonforested)**
- Dedicated and Proposed Special Conservation Areas**
- Site Condition Details**

The following information is displayed, where pertinent, on the attached compartment maps:

- Base feature information, stand boundaries, cover types, and numbers**
- Proposed treatments**
- Site condition boundaries**
- Details on the road access system**

-----------	---------------------	-----	-------------------------	-------------------	----	--------	---------	----------	-------------------------	-----------	----

Prescription Harvest stand to regenerate. No retention due to small stand size. Access stand from the north through private property or from the east.
Specs: Include sale condition of dead and down creation for hare and grouse.

Next Step Monitoring, Natural Regen (Re-Inventory)
Treatments:

Acceptable Regen: Acceptable regeneration includes a moderate to well stocked stand of aspen.

Other Comment:

Site Condition

Proposed Start Date: 10/1 /2025

27	52165027.17_	68.9	4139 - Aspen, Mixed Deciduous	Sawtimber Well	100	111- 140	Harvest	Clearcut with Retention	413 - Aspen	Even-Aged	No
-----------	---------------------	------	----------------------------------	-------------------	-----	-------------	---------	----------------------------	-------------	-----------	----

Prescription Harvest stand to regenerate. Put retention in the area containing the higher Sugar Maple component on the west side of stand for canopy cover diversity. Retaining greater than 10% of the stand is acceptable. Access the stand from the north or northeast through private property.

Next Step Monitoring, Natural Regen (Re-Inventory)
Treatments:

Acceptable Regen: Acceptable regeneration includes a moderate to well stocked stand of aspen.

Other Comment:

Site Condition

Proposed Start Date: 10/1 /2025

7	52166007.20_Cut	31.3	4134 - Aspen, Spruce/Fir	Sawtimber Well	80	81-110	Harvest	Clearcut with Retention	413 - Aspen	Even-Aged	No
---	-----------------	------	--------------------------	----------------	----	--------	---------	-------------------------	-------------	-----------	----

Prescription Specs: Harvest stand with stands to the north in Compartment 52165 if access is ever obtained from the south or east. Include sale condition of dead and down creation for hare and grouse.

Next Step Treatments: Monitoring, Natural Regen (Re-Inventory)

Acceptable Regen: Acceptable regeneration includes a moderate to well stocked stand of aspen.

Other Comment:

Site Condition Unknown Access

Proposed Start Date: 10/1 /2025

Approved Treatments:

66	52165066.28_Cut	48.3	790 - Other Bare/Sparsely Vegetated	Nonstocked	0	Unspecified	Harvest	Clearcut with Retention	6117 - Lowland Deciduous, Mixed Coniferous	Even-Aged	No
----	-----------------	------	-------------------------------------	------------	---	-------------	---------	-------------------------	--	-----------	----

Prescription Specs: Harvest stand to regenerate. Harvest in winter or summer to minimize rutting. Put retention along stream at top of ridge to also act as a buffer.

Next Step Treatments: Monitoring, Natural Regen (Re-Inventory)

Acceptable Regen: Acceptable regeneration includes a moderate to well stocked mix of aspen and coniferous species.

Other Comment: Aspen and bam dying out. Some larger diameter aspen in north part of stand. Areas of higher ground with better quality timber. Stream runs through middle of stand. Need culvert or bridge to cross stream with the best location being on the west side. Access to stand from Old Mackinaw Road is possible, but is fairly wet. Better access would be through Ruxton property off of Nipigon Road, which is much drier. Old next step comments: Regeneration survey. Acceptable regeneration includes a moderate to well stocked mix of aspen and coniferous species.

Site Condition

Proposed Start Date: 10/1 /2015

73	52165073.27_Cut	15.3	790 - Other Bare/Sparsely Vegetated	Nonstocked	0	Unspecified	Harvest	Clearcut with Retention	6130 - Fir, Aspen, Maple	Even-Aged	No
----	-----------------	------	-------------------------------------	------------	---	-------------	---------	-------------------------	--------------------------	-----------	----

Prescription Specs: Harvest stand to regenerate. Cut in winter or summer to minimize rutting. Possible retention location is in center of stand where it may be wetter.

Next Step Treatments: Monitoring, Natural Regen (Re-Inventory)

Acceptable Regen: Acceptable regeneartion includes a low to well stocked mix of aspen and coniferous species.

Other Comment: Poor quality aspen which is 4 sticks high and dying out. Appears to be a fairly wet site with possible high water table. Pockets of higher ground with more Balsam Fir and White Spruce. Aspen canopy is closer to 75% with a heavy Balsam Fir understory. Old next step comments: Regeneration survey. Acceptable regeneartion includes a low to well stocked mix of aspen and coniferous species.

Site Condition

Proposed Start Date: 10/1 /2015

27	4139 - Aspen, Mixed Deciduous	Sawtimber Well	68.9	100	111-140	N/A	Stand was prescribed last entry but was not cut. Some larger diameter aspen and Red Maple. Birch is dying out. Light Beech Bark Disease with some bear claw marks on beech trees. A walking trail is present along the west/center part of the stand coming from the north. Private property owner to the northeast has had survey line cleared. Landowner has also applied for a possible land swap with the state.
