

# TIMBER SALE PRESCRIPTION

## GENERAL

Date 08/01/2011	Forest, Mineral and Fire Management Unit Crystal Falls
Timber Sale Number (if applicable) 12-0??-11-01	Sale Name (or prescription name) Aspen Measurement Block Test C

## LOCAL CONTACT

Name Tom Seablom	Telephone (906) 485-1966
Email Address seablomt@michigan.gov	FAX ( ) -

Map of Project Area Attached

## LEGAL DESCRIPTION

T44N R27W Section(s) 11 & 12 Description E1/2 & W1/2

Year of Entry: 2011 Compartment(s):22 Stand Number(s): 26

## THIS TIMBER SALE CONTRACT IS BASED ON THE FOLLOWING ACREAGE

Estimated Acres: 44.6 Source:  OI  GPS  Other \_\_\_\_\_

Payment will be made on the basis of these estimated acres.

## TREATMENT & OBJECTIVE

STAND #	COVER TYPE	ACRES	BA	TREATMENT	MANAGEMENT OBJECTIVE
26	A6	44.6	126.6	Final Harvest	Aspen

## PRESCRIPTION

1. Cut all trees greater than 2" dbh except pine and cedar.
2. Stay out of vernal ponds.
3. 10.6" average DBH
4. Mixed stand of aspen, balsam fir, balsam polar, red maple, white spruce and other hardwoods.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

**Special Instructions:**

**TIMBER CRUISING SPECIFICATIONS**

This is included in the bid     This is not included in the bid

**Required Basal Area Factor:**     10     20     Other:

**Cruise Line Directions**    The plots have already been established.    The plot locations and numbering is shown on page 5.

CRUISING UNITS	NUMBER OF PLOTS PER ACRE	SPACING (CHAINS)
Southeast 40	1	N/a X N/a
		N/a X N/a
		X
		X
<b>TOTAL NUMBER OF CRUISE POINTS</b>	39	

**Cruise Special Instructions:**

Temporary plots have been established. Plot center is PVC pipe sticking out at least 4" above the ground, flagged, painted, numbered and easy to see. Additional flagging has been placed overhead so the plot may be easily located. All trees, whether 'cut' or 'leave', which are 'in' using a Limiting Distance Table with a Basal Area Factor of 10 have been marked. Marking consists of a horizontal line (about 6") at dbh and a tree number anywhere on the tree, but clearly visible from plot center. Tree numbers start at 1 for each plot.

Azimuth and distance to the center of the tree at the base from the plot center have been recorded along with species. This information will be provided to you by the DNR in an Excel format. When trees are near the edge of the stand, the 'walkthrough' method (Ducey et al 2004) was used to determine 'in' trees. Trees 'in' from the 'walkthrough' method have been counted twice, have two numbers painted on the tree and are listed twice on the Excel spreadsheet.

Using the tree data in the spreadsheet, cruise each tree on the plot according to the following procedure. An example of the data and tally card is shown on page 6. The entire spreadsheet will be emailed to the winning bidder.

DBH: Measure Diameter at Breast Height (DBH) in the location marked on each tree. Round down to the nearest 10<sup>th</sup>. Use a d-tape or an average of a caliper where two measurements are taken at 90°.

H<sub>S</sub>(1'): Measure height for the sawtimber portion of the tree in feet to a 9" Diameter Outside Bark (DOB) or to the sawlog stopper (see Product Standards and Cruising Manual). Round down to the nearest 1'. Minimum DBH is 9.1". If a tree has no sawtimber portion record H<sub>S</sub> as 0 (do not leave blank). This may occur on a tree with no 8' minimum log (9.1" tree with a fork at 6') or has no quality (9.1" tree with branches all the way to the ground). Use a Wheeler Pentaprism®, Laser Ace®, Gator Eyes® or similar device to determine the 9" location on the stem and a clinometer, Relaskop, Laser Ace® or similar device to determine H<sub>S</sub>.

L<sub>DS</sub>: Length of deduct in the sawtimber portion of the tree recorded to the nearest 1'. This is the length of defect between a 1' stump and H<sub>S</sub>1'. This may be in one section or multiple sections, but is recorded as one number. If in multiple sections, add the sections together and record one number. The minimum length for a sawlog is 8'. There is no maximum length. See Product Standards and Cruising Manual for information on deduct

L<sub>DSR</sub>: Length of deduct in the sawtimber portion of the tree that is recoverable for pulpwood recorded to the nearest 1'. The minimum length for recoverable pulpwood is 8'. There is no maximum length. For example, if there is a (H<sub>S</sub> =)30' sawlog section in a tree with a 10' long section in the middle of it that is defective (L<sub>DS</sub> = 10'), 9' of which could be a pulp log, then L<sub>DSR</sub> = 9'.

H<sub>4</sub>(1'): Measure height of the tree in feet to a 4" Diameter Outside Bark (DOB). Round down to the nearest 1'. This can be, but is not necessarily the merchantable height. Record height to a 4" DOB regardless of the location of the pulpwood stopper (denoted as H<sub>P</sub>). Use a Wheeler Pentaprism®, Laser Ace®, Gator Eyes® or similar device to determine the 4" location on the stem and use a clinometer, Relaskop, Laser Ace® or similar device to determine H<sub>4</sub>. If there is a pulpwood stopper (See Product Standards and Cruising Manual), also record the height to the location of the pulpwood stopper, H<sub>P</sub>(1') to the nearest 1'; use a clinometer, Relaskop, Laser Ace® or similar device to determine H<sub>4</sub>.

L<sub>D4</sub>: Length of deduct in the pulpwood portion of the tree recorded to the nearest 1'. This is the length of defect between the H<sub>S</sub> and H<sub>4</sub>(or H<sub>P</sub>, if H<sub>4</sub> ≠ H<sub>P</sub>). This may be in one section or multiple sections, but is recorded as one number. If in multiple sections, add the sections together and record one number. The minimum length for pulpwood is 8'. There is no maximum length. See Product Standards and Cruising Manual for information on deduct.

Every 4th tree on each plot has been painted with a different colored number, e.g. tree #4, tree #8, etc. These are the sub-sample trees. The sub-sample trees will require 3 additional measurements: DFH, H1' and H<sub>C</sub>1'.

DFH is the diameter at form-class height (17.3') measured to the nearest 0.1" using a Wheeler Pentaprism®, Laser Ace®, Gator Eyes® or similar device. The location, i.e. 17.3', would be determined using a clinometer, Relaskop, Laser Ace® or similar device. If the H<sub>4</sub>1' height is less than 17.3', then record zero.

H1' is the total height of a tree measured to the nearest 1' using a clinometer, Relaskop, Laser Ace® or similar device.

H<sub>c</sub>1' is the height at the base of the (merchantable) crown (where the base of the first merchantable branch occurs) to the nearest 1' using a clinometer, Relaskop, Laser Ace® or similar device. If there is no merchantable branch, then record zero. A fork is considered a merchantable branch. The main stem would be considered the stem with the most value.

In addition to the tree measurements, you must track your time conducting this test. If you are using a portable data recorder, this could be used for time tracking. Time starts when you leave your truck to begin measurement and ends when you return to your truck. If you take breaks or lunch in the woods, then stop your time at the beginning of each break and start when you resume work. This is an important attribute of our test so it is important that you remember to start and stop your time appropriately.

Tally sheets will be provided by the DNR. Output from an electronic data recorder is acceptable.

**TIMBER MARKING SPECIFICATIONS**

- This is included in the bid     This is not included in the bid
- Precise specifications to be delineated at pre-work meeting with DNR staff

Total Merchantable Residual BA (Basal Area): \_\_\_\_\_ (Minimum \_\_\_\_\_ to Maximum \_\_\_\_\_)

**SPECIAL MARKING INSTRUCTIONS**

Unless otherwise specified, the tally sheets used must be those provided by the Forest Management Unit.

**RESTRICTIONS**

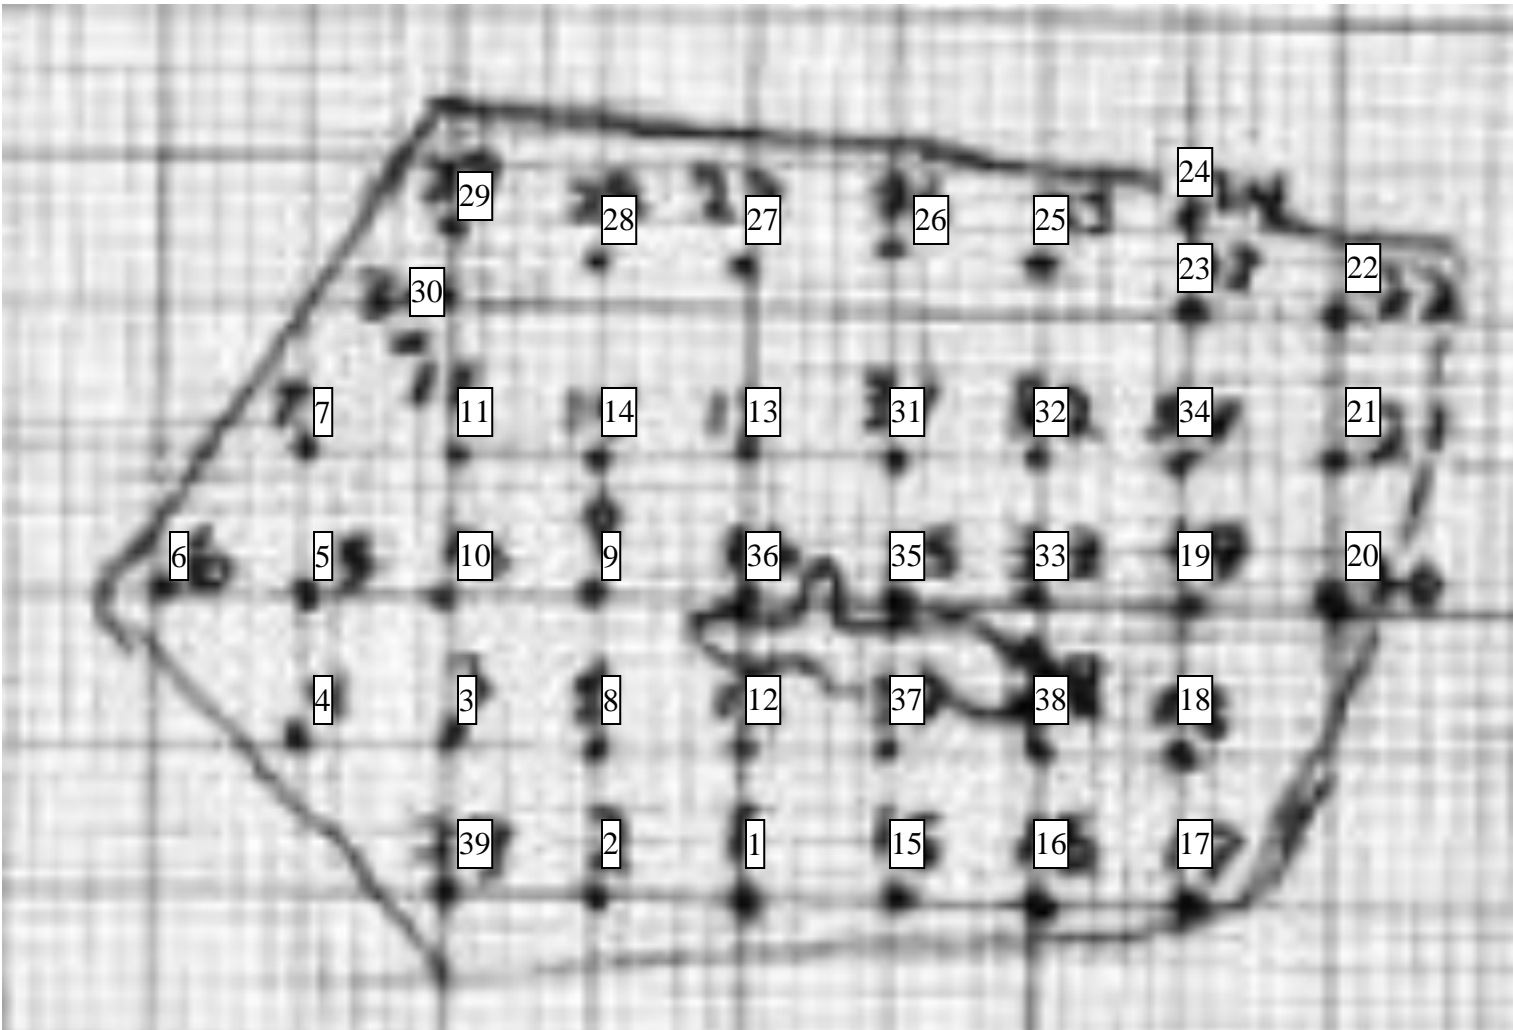

1. Forest Management Division must be able to identify who did what on the timber sale.
2. This work is to be performed by one person.

**PAINT**

1. None needed.

**DELIVERABLES**

1. The name of the person that did the cruising.
2. Tally from each plot in the Excel spreadsheet provided by the DNR.
