**SPECIAL MARKING INSTRUCTIONS**  
 Mark on both sides of the tree. On hills, marks should face the downward slope. Manage for the best tree in place, but favor leaving basswood and sugar maple for crop trees, and remove poorly formed and defective trees. Beech bark disease is a concern in this compartment, so mark out rough bark beech and leave smooth barked trees for mast & crop trees. EAB is also evident & all Ash should be salvaged. Some living den trees should also be left for wildlife. For sawlog trees, paint dots on one side of the tree only to represent the number of 8' logs tallied. The other side will be marked with an **X**. Stump marks are to be placed from the ground up one foot clearly visible. Do not mark on rainy days or with snow around the stumps. With clump grown trees with multiple stems, treat it as one tree by marking entire clump or leaving entire clump.

Unless otherwise specified, the tally sheets used must be those provided by the Forest, Mineral and Fire Management Unit.

**RESTRICTIONS**

1. Forest, Mineral and Fire Management Division must to be able to identify who did what on the timber sale.
