Re: Information Request dated January 11, 2018 – Enbridge Initial Response

Dear Mr. Reichel:

This letter provides Enbridge's initial response to your letter to Brad Shamla dated January 11, 2018. As we have discussed, we expect to provide additional information on a rolling basis going forward.

1. As you and I discussed earlier this week, Peter Holran, of Enbridge, has spoken to Travis Warner of the Michigan Agency for Energy regarding setting a schedule for the semi-annual reviews agreed to in the November 27, 2017, Agreement between the State and Enbridge. Mr. Holran's communication with Mr. Warner is responsive to the request that appears on page 3 of your January 11 letter.

2. In response to ¶ 5 of your letter, Enbridge has asked Steptoe & Johnson to establish a Sharepoint site that can be used to make Enbridge's current Integrity Management Plan available to representatives of the State. We are prepared to make access to the site available to representatives whom the State designates. To designate a representative, please provide us with the representative's name and email address. We will then forward separately an invitation to each designated representative that will include instructions on how to create a password and access the site. We assume that you personally will be one of the representatives wanting access

to the site, and we will be providing an invitation to you later this afternoon. It is my understanding that documents are available on the site now, and can be accessed as soon as each representative receives his or her invitation and sets up a password.

3. You and I previously discussed how best to respond to the requests in ¶ 6 of your letter, which relate to the process and information for identifying HCAs. As we discussed, Enbridge is currently in the process of updating the information used to identify HCAs. We believe that the most efficient method of exchanging information on this topic initially will be to have a joint call involving SMEs from both the State and Enbridge in which the Enbridge representatives can provide details and answer questions about the current status of this process at Enbridge.

To this end, we are informed that the relevant Enbridge SMEs would be available to talk with State representatives at any of the following times next week:

- Wednesday, January 31: 11 a.m. to 2:00 p.m. EST (1-4 p.m. MST)
- Thursday, February 1: Noon to 2:00 p.m. EST (2-4 p.m. MST)
- Friday, February 2: 10 a.m. to 1:00 p.m. EST (8-11 a.m. MST)

Please let us know which of these times is best for the State and its representatives and we will set up a call.

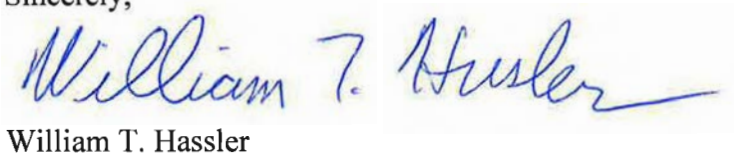

4. With respect to the request stated in ¶ 7, which relates to risk assessments used to address HCAs, stream crossings and ecologically sensitive areas, Enbridge is still in the process of collecting the information requested. David Coburn or I will provide an update next week on an expected date for uploading the materials being collected. We appreciate your courtesy in waiting for this part of the response.

5. The items above cover the priority items originally identified in your letter. Enbridge also is in the process of collecting information responsive to the requests in ¶¶ 1 to 4 of your letter. David or I will provide you with an update next week on where we stand on providing information responsive to the latter requests.

Steptoe
STEPTOE & JOHNSON LLP

I hope that the initial response outlined above is helpful, and look forward to exchanging additional information going forward. Please let either David or me know if you have any questions about the matters discussed to date.

Sincerely,

William T. Hassler
